1/ STATEMENT BY THE BOARD OF DIRECTORS OF SIRMA GROUP HOLDING JSC

The present annual individual report of the management of SIRMA GROUP HOLDING JSC covers the period, ending on 31 March 2019 and was prepared in accordance with the provisions of Article 39 of the Accountancy Law and Art. 100o, para. 2 and 5 of the Law on the Public Offering of Securities (POSA), including also the established events, occurring after the balance sheet date. The structure of this report is in accordance with Annex 9, 10 and Appendix 11 to Article 32a (2) of Ordinance No. 2.

The board of directors of the holding confirms that:

- there were no irregularities in which managers or employees were involved, which may be material to the consolidated financial statements;
- all material transactions are duly accounted for and reflected in the annual financial statements as at 31 March 2019;
- there is no actual or potential breach of laws and (or) other regulatory provisions that would have a material impact on the individual financial statements or could serve as a basis for reporting contingent loss;
- there are no legal or other restrictions on the flow of funds;
- there are no known trends, requests, commitments, events or occasional circumstances for which there is reason to expect that they may affect the company as a whole.

This management report contains estimates and information based on our beliefs and assumptions, using currently available information about them. Any statements contained in this report that are not historical facts are predictions. We have based these statements on the future of our current expectations, assumptions and predictions about future conditions and events. As a result, our predictions and information are exposed to uncertainties and risks, many of which are beyond our control. If one or more of these uncertainties or risks materialize or if the underlying management assumptions prove to be incorrect, our actual results may differ materially from those described in the report. We describe these risks and uncertainties in the Risk Section of the report.

The words "purpose", "predict", "accept", "believe", "in the future", "we could", "rely", "we are confident", "appreciate", "expect", "we intend", "we can", "can", "prospect", "plan", "project", "predict", "would" and other similar expressions are intended to identify these forward-looking statements. Such estimates are, for example, those made in the Business Results section of our quantitative and qualitative disclosures about market risk in accordance with International Financial Reporting Standards (IFRS), namely IFRS 7 and related statements in our Notes to the financial statements, our prospects for development, and other forecast information that appears in other parts of

this report. Unless required by law, we do not commit and we have no obligation to update or revise predictive statements as a result of new information we have received about the conditions that existed at the time of this report, future events, or otherwise unless we are obliged to do so under the law.

This report includes IT industry statistics and global economic trends that come from information published by sources including International Data Corporation (IDC), a market information and information technology consultant, telecoms and consumer technology markets; Gartner, the European Central Bank (ECB); and the International Monetary Fund (IMF). This data type is only the forecasts of IDC, the ECB, the IMF and other data sources for the global economy and industry. SIRMA does not guarantee any statistical information provided by sources such as IDC, Gartner, ECB, IMF, or other similar sources cited in this report. In addition, although we believe that information from these sources is generally reliable, this type of data is inaccurate. We warn readers not to create unnecessary dependence on this data.

In our Individual Management Report, we analyze our business activities for the reporting financial period as well as the current situation of Sirma Group Holding. Starting from a description of our business, economic environment and strategy, we present our financial system and explain in detail our results and operations as well as our financial position and net assets. We also report on the various aspects of financial sustainability of Sirma Group Holding and the expected development of possible risks.

The financial information presented in the Sirma Group Holding JSC report includes our separate financial statements, our report to the Board of Directors and some financial aspects derived from our management accountability. The non-financial data presented in the report includes aspects of intellectual, human and social rights and relationships derived from our materiality assessment.

Our annual separate financial statements have been prepared in accordance with IFRSs. Internal control over financial reporting ensures the reliability of the information presented in the separate financial statements. Our Board of Directors has confirmed the effectiveness of our internal financial reporting.

The reporting period is the financial period ending on 31.03.2019. The report includes the activity of Sirma Group Holding JSC.

Strategy execution of Sirma Group Holding

In pursuance of the strategy, the group will move to a new technological level by creating a NEW MODERN CLOUD SYSTEM OF SOFTWARE PRODUCTS, SOLUTIONS AND SERVICES BASED ON COGNITIVE TECHNOLOGIES, USING THE TRANSITION OF ENTERPRISES AND ORGANIZATIONS FROM DIGITAL TO INTELLIGENT.

For this purpose, Sirma reorganizes the corporate structure, concentrates intellectual property and solutions for financing development. The Group will continue to work towards the development of foreign markets and the sale of customized solutions to complex problems. At the same time, we are

looking to accelerate the growth of recurring revenue with low marginal costs - moving from product sales to cloud-based services, the SaaS model, and investment in marketing and sales.

PARTICIPATION IN MANAGEMENT AND IMPLEMENTATION OF CONTROL ON THE SUBSIDIAR COMPANIES

In Q1 2019, as in previous periods, Sirma Group Holding's senior management was actively involved in the management of its subsidiaries. The high expertise and accumulated experience of Sirma Group Holding's managers helped companies to formulate their development goals and strategies as well as their business and financial plans. As a

Targets

The Group has set out the following targets for reporting on the implementation of the strategy:

- >35% average annual revenue growth
- >70% revenue share from SaaS
- > 70% revenue share from North America and Europe
- > 29% EBITDA margin

Revenue growth will be backed by strengthening market share in cognitive services, one of the most promising segments of the IT sector where Sirma Group has significant expertise.

Implement the strategy

The levers we will focus on implementing the strategy include:

- Strengthening the leading positions for software services, managed services, system integration;
- Increase investment in marketing and sales of the existing product portfolio
- Marketing of products on the foreign market, with a focus on insurance, engineering and healthcare
- Acquisition of companies as a sales platform
- Add new services - Data as a Services; PaaS; SaaS, and so on.
- Decrease the amount of non-controlling participation and consolidation of IP rights

The Group aims to become a globally recognized player in the market for the delivery of cognitive products, solutions and services by uniting the internationally renowned and market-proven products and top technologies in the Sirma Cognitive System and developing vertical specialization.

result, the company achieved outstanding successes over the past year. At the same time, taking part in the management of the Group's companies, they monitored the Group's overall objectives, strategies for its development and financial discipline.

MARKETING

In operational terms, the annual marketing strategy and budget of the Sirma Group Holding for 2019 ensured the planning, development and successful implementation of the following activities:

1. Creating, developing and maintaining a general knowledge of the Sirma brand through a range of activities that help for successful branding and corporate communications - public relations, investor relations, public institutions, company employees, general public. They included internet marketing, online meetings, helping managers and managers with marketing materials for their investment tours, press interviews, TV, radio, participation in specialized and high profile business events.

2. Building a strong employer brand and affirming the company as an attractive place to work, career development and realization of own innovative ideas for creating new software products and solutions, working with the most advanced technologies, entering new market niches. A favorable environment has been created and the innovation process in companies is regularly promoted. Social media is actively used for informal communication with employees,

engaging in important causes, informing about upcoming events, company and product news. The team building conducted at the end of the year was traditionally one of the most anticipated events that enabled people from different companies, cities and offices to communicate in an informal environment.

3. Increased presence of the brand in social media and communication management through digital channels. As part of marketing through social channels, a content marketing program has been developed. It aims at:

- enhanced performance across the global network through digital tools - a substantial increase in traffic to Sirma Group Holding sites and subsidiaries; improved detection in the most popular search engines - SEO & SEM activities;
- raising awareness of external and internal audiences about corporate initiatives and key business events;
- informing the audience about new products and services created by our companies, the development of existing products and services, company achievements;

FINANCIAL ACTIVITY AND MANAGEMENT OF FINANCIAL RESOURCES OF THE GROUP

ASPECTS OF THE FINANCIAL ACTIVITY OF HOLDING AND GROUP

Over the past period the management of the financial activities of Sirma Group Holding was carried out in the following:

I. Goals

As a **strategic goal** of financial management, Sirma Group Holding has accepted the increase in the wealth of the owners, which can only be achieved by maximizing the market value of the company based on the share price.

As a **tactical objective** of the financial management, Sirma Group Holding JSC opted the maximization of revenues and profit.

As an **operational objective** of financial management, Sirma Group Holding has determined the maintenance of the solvency of the company and the Group companies as an opportunity to service all emerging uncontested payments.

II. Execution of functions

1. Executed functions of Sirma Group Holding's management::

a) Financial planning - plans of Sirma Group Holding and of all companies of the Group for a one-year and mid-term period were prepared.

b) Co-ordination of the financial activity - Sirma Group Holding coordinated the activities of all the companies in the Group for the fulfillment of the general objectives of the financial activity management and for the implementation of unified policies in this activity;

c) Control - The financial team of the Sirma Group Holding throughout the year carried out regular and

periodical control over the financial activity of the companies in the group.

2. As regards the financial activities of Sirma Group Holding and the subsidiaries, the Holding had the following functions:

a) financing - related to the provision of financial resources and the structuring of capital needed for the proper functioning of the enterprise.

This function is related to the company Balance liability. There are the sources of capital available to the enterprise for the conduct of its business.

b) investment - covers the insured capital in different assets in order to realize the strategic objective of the company. This feature is related to the Balance asset.

III. Completed tasks

1. Ensure sufficient financial resources in accordance with the strategy and tasks for the development of Sirma Group Holding and the subsidiaries during the respective period.

2. Ensuring the most efficient allocation and utilization of the volume of financial resources formed in the main directions of the Group's activity.

3. Optimization of the monetary turnover - synchronization by size and time of the receipts and payments for the normal service of the undisputed payments.

4. Ensure maximum profit at a given level of risk.

5. Ensure the financial equilibrium of Sirma Group Holding and the subsidiaries in the process of their development.

In fulfilling the task of financial equilibrium, we have complied with the golden balance rule, which requires long-term assets to be funded by long-term capital sources, and short-term assets from short-term sources of capital.

- ACCOUNTING SERVICES

In Q1 2019 Sirma Group Holding performed the accounting services of 18 subsidiaries and associated companies and related companies, which has 4 companies more than the previous period. In addition to regular accounting services, management is presented with various BI reports built as know-how of the Group. The FAD of Sirma Group Holding achieved monthly reporting of results at individual and group level. The department also managed to manage the companies' relationships with the fiscal and social security

- LEGAL SERVICES

The legal department of Sirma Group Holding carries out legal services to the companies of the Group, which includes the preparation of corporate documents; assistance with the

- MANAGEMENT OF RISKS

The management of the risks of Sirma Group Holding is the responsibility of the Board of Directors. In his activities, he is assisted by the Investment and Risk Committee. The holding also supports its subsidiaries for risk management.

Risk management is, inherently, the ability to anticipate threats to the company's activities, individual projects and minimize their adverse effects. The process is iterative. It starts with identifying the possible risks, goes through risk analysis and planning their management, then begins a process of monitoring and a regular return to the analysis process.

In Sirma Group Holding a sophisticated risk management system has been set up.

Risk management in the Sirma Group Holding includes:

- Risk identification - This is a lengthy process that detects potential threats. In order to identify the expected and predictable risks, different methods are used: questionnaires (interview questionnaires), interviews, brainstorming, document analysis, a list of expected and predictable risks (checklist analysis), based on a previous experience
- Qualitative and quantitative risk analysis - Once the potential risks have been identified, a qualitative and quantitative analysis of each of them is required. The likelihood of occurrence and impact through predefined scales is estimated, for example Probability: very small, small, medium, large or very large; Impact: catastrophic, critical, permissible, insignificant.

A risk table is prepared with the data. Risks are grouped into categories, their likelihood of occurrence and their impact, as well as case scenarios that are implemented in case the risk occurs. The resulting list is sorted by impact and probability. A threshold is set, the risks over which it will be managed.

IMPACT OF EXCLUSIVE FACTORS

The information in this report is not affected by the presence of exceptional factors.

6. Providing opportunities for quick capital reinvestment when changing the external and internal conditions for carrying out the business activity.

systems. The timely introduction of taxes, timely information submission and the preparation of information under the Law for Public Offering of Securities to the Financial Supervision Commission and the BSE have been performed in the period.

preparation and implementation of the GMS; preparation of any commercial documents and contracts; settlement of commercial disputes; conducting court cases.

The risk table is reviewed and reassessed on a regular basis, as there is a chance that risks may be dropped, new ones added or ratings changed.

- Planning actions to overcome the risk

The next step in risk management is planning. This is the process of documenting the measures that will be applied to managing each of the identified key risks. 3 management strategies are used:

- a) risk avoidance - a strategy that reduces the likelihood of risk occurring;
- b) minimizing the risk-taking effect - a strategy that reduces the consequences of the risk;
- c) Emergency action plans - a strategy where the organization accepts the risk and is ready to deal with it if it comes to fruition;

As a result of the risk planning, a Risk Mitigation Monitoring and Management Plan is established. It may be a separate document or a set of information cards for each individual risk to be stored and managed in a database.

- Risk monitoring and control - This is the latest activity in risk management. This process has several main tasks:
 - confirm the occurrence of a risk
 - ensure that activities to prevent or deal with risks are implemented
 - Identify what risk has caused the relevant problems
 - document information to be used in a subsequent risk analysis

SUMMARY INFORMATION RELATING TO THE STATE OF WHICH THE COMPANY DEPENDS ON PATENTS OR LICENSES, INDUSTRIAL, COMMERCIAL OR FINANCIAL CONTRACTS OR FROM NEW PROCESSING PROCESSES

7/ PERSONNEL AND ECOLOGY

Sirma Group Holding maintains and observes its commitments in compliance with the national legislation in the field of environmental protection. The company applies measures for separate collection of waste, minimization, recovery and recycling of municipal waste. In 2017, the use of plastic cups stopped, and they were replaced with porcelain and glass cups.

The Company believes that its employees play a key role in the development of its business and the overall

corporate goals and therefore pays special attention to the development of a common human resources management

strategy and policies. Sirma Group Holding's policies in this regard are aimed at stimulating the responsibility and motivation of the staff to fulfill the assigned tasks and objectives.

The company and the companies in the group apply certain selection criteria and consider that they have an ambitious team of professionals capable of pursuing the strategic and operational objectives. Sirma Group Holding invests in various training programs for its employees and provides its employees with opportunities for professional development.

The structure of the personnel of Sirma Group Holding has the following dynamics:

DESCRIPTION OF ALL AGREEMENTS FOR THE PARTICIPATION OF THE EMPLOYEES IN THE CAPITAL OF THE COMPANY.

There are no arrangements for the participation of employees in the capital of the Company.

8/ RISK FACTORS

8.1 System Risks

The general risks stem from possible changes in the overall economic system and, in particular, a change in the conditions of the financial markets. They can not be diversified, as all economic entities in the country are exposed to them.

Twenty-five years after the end of the planned economy in Bulgaria, a policy of economic reforms and stabilization aimed at the imposition and functioning of the principles of a free market economy is being pursued. As a result, business entities in Bulgaria have a limited history of activity in free market conditions. In this regard, Bulgarian companies, compared to Western companies, are characterized by a lack of experience in the market economy and limited capital resources, with which to develop their business. Bulgaria also has limited infrastructure to maintain the market system.

In Bulgaria, as in most transition countries, there is a trade deficit and a current account deficit. Our country is an importer of crude oil and energy resources. In this regard, increases in oil prices and energy resources reduce the competitiveness of the Bulgarian economy and, in addition, its dependence on oil and energy imports further exposes the economy to currency risks from unfavorable changes in the USD exchange rate against the Bulgarian Lev. The capital gains from privatization are expected to gradually decrease as the privatization program is completed.

8.1.1. Economic Growth

The interaction between economic growth and external indebtedness of the country has a direct impact on the formation and change of market conditions and the investment climate. Official statistics show real GDP and GDP growth per capita in recent years, which are in line with the government's development agenda.

According to published information from NSI, after the introduction of the currency board system in 1997, Bulgaria achieved macroeconomic stability and good indicators for economic development.

Delayed economic growth, not only in Bulgaria but also in other countries where the Company realizes its output, means reduced activity on the part of economic operators, where there is also a reduced level of investment in general and in particular in software solutions. In this respect, lower economic growth adversely affects the

Company's activity and would prevent the future plans from being realized according to predefined parameters.

8.1.2. Political Risk

The political risk is the likelihood of a change in government, or a sudden change in its policy, the emergence of internal political turmoil and unfavorable changes in European and / or national legislation, resulting in a negative change in the environment in which local businesses operate, and investors to suffer losses.

The political risks for Bulgaria at international level are related to the commitments made to implement serious structural reforms in the country as an equal member of the EU, increasing the social stability of the inefficient spending on the one hand, as well as the severe destabilization of the countries The Middle East, the increasing threats of terrorist attacks in Europe, refugee waves, and the volatility of key countries in the immediate vicinity of Bulgaria.

Bulgaria, as well as the other EU member states in the region, continues to be seriously affected by the common European problem of the intensive Middle East refugee flow.

Other factors that also affect this risk are possible legislative changes, particularly those that concern the economic and investment climate in the country.

8.1.3. Credit Risk

The credit risk of the country is related to the ability of the state to repay its obligations regularly. In this respect, Bulgaria is constantly improving its position on the international debt markets, which facilitates the access of state and economic agents to external financing. The most important effect of the credit rating improvement is the lowering of loan risk premiums, which leads to more favorable interest rates (on equal terms). For this reason, the potential increase in the country's credit rating would have a beneficial impact on the Company's activity and more precisely on its financing. On the other hand, lowering the credit rating of Bulgaria would have a negative impact on the cost of financing the Company unless its loan agreements are fixed-rate. The

determination and measurement of this risk is carried out by specialized international credit agencies.

At the date of this document, the credit rating of the Republic of Bulgaria is as follows:

- Standard & Poors - Long-term BB +, short-term C, stable outlook both in foreign and local currencies;
- Moody's - Long-term Baa2 with a stable outlook for foreign and local currencies;
- Fitch Ratings - foreign currency long-term BBB- with stable outlook, short-term F3 with stable outlook and local currency long-term BBB with stable outlook.

Bulgaria continues to fund its needs under relatively good credit conditions, given the reduced long-term ratings. The quantitative easing policy of the European Central Bank implies the maintenance of historically low interest rates in Europe, from which it would stimulate the attraction of credit resources from all economic subjects, including the Company.

8.1.4. Currency Risk

Exposure to the currency risk is the dependence and effects of exchange rate fluctuations. The systemic currency risk is the probability of a possible change in the currency regime of the country (The Currency Board), which would either lead to a depreciation of the Lev or a rise in the Lev against foreign currencies. The currency risk will have an impact on companies with considerable market share, whose payments are made in a currency other than the Lev and the Euro. Since the Bulgarian Lev is fixed to the Euro in EUR 1 = BGN 1.95583 and the Bulgarian National Bank is obliged to maintain a level of Bulgarian Levs in circulation equal to the foreign currency reserves of the bank, the risk of depreciation of the Lev against the European currency is minimal and consists in the eventual early elimination of the Currency Board in the country. This seems unlikely at this stage as the expectations are that the Currency Board will be abolished when the Euro is adopted in Bulgaria as an official legal tender. Theoretically, the currency risk could rise when Bulgaria joins the second stage of the European Monetary Mechanism (ERM II). This is a regime in which the country has to maintain the exchange rate against the Euro within +/- 15% against the central parity. In practice, all countries currently in the mechanism (Denmark, Estonia, Cyprus, Lithuania, Latvia, Malta) are experiencing fluctuations that are substantially lower than the ± 15% allowed. The fixed exchange rate of the Lev to the Euro does not eliminate the risk of unfavorable movements of the Euro against other major currencies (US Dollar, British Pound, Swiss Franc) on the international financial markets, but at present the company does not consider that such a risk would have a significant impact on its activities. The Company may be affected by the currency risk depending on the type of currency of its revenue and the type of currency of potential borrowings of the company.

8.1.5. Interest Rate Risk

The interest rate risk is related to possible negative changes in the interest rates established by the financial institutions in the Republic of Bulgaria.

At its meeting on monetary policy on 13 December 2018, the Governing Council decided to suspend net asset purchases in December 2018, keeping the ECB's key interest rates unchanged and further developing its asset reinvestment guidance. Although incoming data are weaker than expected, reflecting lower external demand, and due to country and sector-specific factors, strong domestic demand continues to support the eurozone's economic upturn and the steadily rising inflationary pressures. This reinforces the Board of Trustees' belief

that a sustained convergence of inflation to its target level will continue and will persist even after the net asset purchase cease. At the same time, there remains considerable uncertainty about geopolitical factors, the threat of protectionism, vulnerabilities in emerging countries and the fluctuations in financial markets. Therefore, a policy of significant monetary stimulus is still needed to support the further strengthening of domestic price pressures and overall inflation dynamics in the medium term. The Governing Council's benchmark on key ECB interest rates, backed by the reinvestment of a significant volume of assets, continues to provide the necessary money supply for the sustainable convergence of inflation to its target level. In any event, the Governing Council is prepared to adjust all its instruments according to circumstances to ensure that inflation continues steadily closer to its target level.

8.1.6. Inflation Risk

Inflationary risk is a general price increase whereby money is depreciated and there is a likelihood of loss from households and firms.

Inflationary risk is a general price increase whereby money is depreciated and there is a likelihood of loss from households and firms.

8.1.7. Risk from unfavorable changes in tax and other legislation

The taxes paid by Bulgarian merchants include taxes at source, local taxes and fees, corporate income tax, value added tax, excise duties, export and import duties and property taxes. The tax system in Bulgaria is still developing. This may result in contradictory tax practices, both at state and local level.

Investors should also take into account that the value of the investment in shares may be adversely affected by changes in the current tax legislation, including its interpretation and application. In addition, tax legislation is not the only one that can undergo changes, and these changes adversely to affect the Company's business. Although the bulk of Bulgarian legislation is already harmonized with EU law, the application of the law is subject to criticism by the European partners in Bulgaria. Judicial and administrative practice remains problematic: the Bulgarian courts are not able to effectively resolve disputes over property rights, breaches of legal and contractual obligations, etc., resulting in a systemic regulatory risk being relatively high.

Unfavorable changes to tax and other laws would lead to a worsening of the general conditions in which the Company operates, from wherever its future results may deteriorate. In particular, the increase in the corporate income tax and other taxes would reduce the ultimate disposable profit for new investments and / or the distribution of dividends to its shareholders.

8.1.8. Force Majeure Risks

Force majeure events such as natural disasters, sabotage, war and terrorist acts, and others may lead to unpredictable changes in investor and interest in the market for all shares, as well as, in particular, the shares of Sirma Group Holding. Some force majeure events do not provide for the possibility of insurance.

Force majeure events could seriously affect the Company's performance by reducing its ability to conduct normal business activities and cause an increase in some cost items.

8.2. Non-system Risks

Non-system risks are associated with the overall investment risk specific to the firm and the industry itself. Non-system risks can be divided into two types: sectoral risk related to the uncertainty in the development of the sector as a whole and general business risk - arising from the specifics of the particular company.

8.2.1. Industry Risks

The activity of the Company and of the companies within Sirma Group are exposed to various risks, including: 1) risks typical of the Information and Communication Technology (ICT) industry and 2) risks specific to the Company itself. Revenue and profit of the Company may be adversely affected by a number of factors: the financial market situation and the information and communication technology market; the ability of the Company to ensure effective management, assessment of the different risks and economic feasibility of individual transactions, the economic climate in the country and others.

8.2.2. Specific Company Risk

The company risk is related to the nature of the Company's business, as for every firm it is important that the return on the invested funds and resources is consistent with the risk associated with the investment.

The main company risk for Sirma Group Holding JSC is related to the possibility of reduction of the solvent demand for the products and services offered by the Group, as well as changes in the terms of sale of those products and services. The company risk may have an impact on the growth of service and software solutions development contracts. Uncertainty can be measured by the variability of revenue earned over time. This means that the more volatile the revenues of a company, the greater the uncertainty of the company to realize a positive financial result, i.e. the risk for the investors, respectively the creditors, will be higher.

8.2.3. Operation Risk

Operational risks are related to the management of the company and can be expressed in the following:

- Making erroneous decisions for the ongoing management of the investment and liquidity of the company by the management staff;
- the inability of the management team to start the implementation of planned projects or lack of suitable personnel for this;
- key employees leaving and impossibility to recruit new ones;
- the risk of excessive spending on management and administration, leading to a reduction in the overall profitability of the company.

Various mechanisms will be used to optimize and manage this risk, including the following:

- sound investment policy;
- optimizing the structure, quality and return on assets of the Company;
- protection against unfavorable and undesirable external factors and attacks, etc.

8.2.4. Intellectual Property Protection

The protection of the intellectual property of the Group is crucial to its success. It uses a variety of tools to identify and control potential risks and to protect its intellectual property. These measures include application for patents, trademarks, and other brands and copyrights to prevent

infringement of copyright and trademarks. Despite these efforts, the Group may not be able to prevent third parties from using or selling without permission what it regards as its own technology. All these measures provide only limited protection and its rights could be challenged or otherwise affected. Any intellectual property may be vulnerable to disclosure or misuse by employees, partners or third parties. Third countries can independently develop technologies that are substantially equivalent to or better than the technology of the Company. In addition, a third party may reengineer or otherwise obtain and use technology and information that the Group considers to be its own. In this regard, the Company may not be able to protect its proprietary rights against unauthorized copying or third party use, which could have an adverse effect on the competitive and financial situation and lead to a decline in sales. In addition, the laws and courts of some countries may not offer effective protection of intellectual property rights.

8.2.5. Risk of concluding insider deals at prices differing from the market ones

The company is part of an economic group. The risk of engaging in transactions with Group entities, whose conditions differ from market at the date of the transaction is eliminated to the extent that the Company seeks to maintain a transparent policy regarding its relations and the treatment of related companies. As far as there are transactions in the economic group, they are concluded under standard market conditions at the moment of transaction and do not favor any of the parties.

8.2.6. Risk of asset depreciation

The impairment risk of assets is related to the possibility of reducing the carrying amount of the Company's assets. Possible impairment of tangible and / or intangible fixed assets would result in the need to account for an impairment loss. This, in turn, may worsen the Company's future financial performance as well as lead to a final negative financial result for an annual period. This in turn leads to the risk of not being able to distribute dividends to existing shareholders at this future moment, as well as a possible decrease in the market price of a shares of the Company due to the deteriorated financial indicators.

8.3. Risk factors, characteristic of share traded on the Stock Exchange

The risk of investing in securities is linked to the uncertainty and the inability to accurately predict future effects and the impact on the expected return on the investment made.

The main risk and uncertainty for the shareholders of Sirma Group Holding JSC is the probability that the investments in the company's shares will not retain its value, nor generate the expected return on them, due to a decrease in the price of the shares or a lack of other income (dividends) from them.

Sirma Group Holding JSC informs potential investors that investing in shares is associated with certain risks. Investors should carefully read and understand the risks associated with investing in shares of the current issue before making an investment decision.

Sirma Group Holding JSC seeks to maintain a low risk profile by maintaining low levels of financial and operational leverage, a high level of operational efficiency, the introduction of strict rules and procedures in the management of the activity and strict control over their compliance, diversification of the client base and suppliers.

The above makes the company resistant to external negative shocks, but nevertheless has significant risks for

its business that could negatively affect the company's results.

8.3.1. Price Risk

The changes in the price of the shares of Sirma Group Holding JSC can be created both from the fundamental state of the Company - current and expected results from the activity and financial results as well as from the economic and market conditions in Bulgaria and from the market and economic conditions in the world economy.

Shareholders should keep in mind that events that may cause sudden fluctuations in market prices of shares that have previously occurred on the Bulgarian capital market and in international financial markets may occur and that such fluctuations are likely to affect unfavorable price movements of the shares of Sirma Group Holding JSC.

The market value of the shares will be determined on the basis of supply and demand, and the share price may increase or decrease. These "price fluctuations" can cause a security to cost at a certain point much less than the value at which it is purchased. This price dynamic is particularly typical for the ordinary stock market, whose stock prices may be subject to sharp fluctuations as a result of publicly disclosed information about the Company's financial performance, changes in legislation and other material events.

A significant number of sales of the shares of Sirma Group Holding JSC for a certain period of time may have an adverse effect on the maintenance of their achieved price level. Such an event would result from a significant excess of the sellers of those shares over buyers in that period. At this point in time, the Issuer or a third party does not commit to maintaining a particular price level and a significant number of sales may lead to a decrease in that level.

The Company does not guarantee to investors that the price of its shares will remain stable and / or increase its value in the future. At the moment of preparation of this document, Sirma Group Holding JSC or, to the best of its knowledge, other persons, do not intend to purchase shares of the Company in order to preserve and / or increase the market price of the Company's shares after the increase of capital.

8.3.2. Liquidity Risk

Liquidity risk is directly related to the liquidity of the securities market itself and expresses the potential for short-term purchase or sale of the securities on the secondary market. The liquidity of the issue depends on the number of investors who will be interested in investing in the issue. The liquidity risk of the shares will also depend on the development of the equity market in terms of the volume and variety of instruments offered, the issuer's financial position, the ability of the local capital market to attract new investors,

Investors should keep in mind that the BSE is significantly smaller and less liquid than the securities markets in most developed market economies. Thus, for the shareholders of Sirma Group Holding JSC there is no guarantee that the listing of the shares of the Company on the BSE will guarantee their active trading and sufficient liquidity.

8.3.3. Inflation Risk

The manifestation of the inflationary risk for the shareholders of Sirma Group Holding JSC would arise in cases when the income from the shares (increase in the price and / or received dividends) were lower than the inflation for the investment period. The inflation processes leads to a decrease in the real yield that investors receive.

Although in the long run equity yields usually outweigh the inflationary processes in Bulgaria and other countries with a developed market economy, there is no guarantee for the investors in the shares of Sirma Group Holding JSC that their investment in shares of the Company will represent a real protection against inflation.

8.3.4. Dillution Risk

Pursuant to the Articles of Association of the Company no limitations on the maximum amount of future issues of shares are envisaged. For this reason, shareholder participation may be reduced as a result of a public offering if they do not exercise their rights and do not subscribe a proportionate share of the new shares. In the event that, as a result of a future public offering, the number of issued shares of the Company increases at a faster rate than the amount of the assets of the Company, it is possible to decrease the value of the assets per share of the Company.

8.3.5. Currency Risk

This current issue is denominated in BGN. Currency risk of the investment exists for investors whose funds are denominated in US dollars or currencies other than Lev and Euro, due to the constant exchange rate movements. Investors who take a currency risk in the purchase of the current issue would increase or reduce the effective return on their investment as a consequence of strengthening or weakening the BGN and EUR exchange rate against the currency in which the investor's funds are denominated.

Stability and high confidence in the credibility of the Currency Board in the country, as well as the relatively stable positions of the euro on international currency markets, reduce the existence of the currency risk to minimum levels.

8.3.6. Lack of an annual dividend payment guaranty

The financial results of the company depend on many factors, including the skills and professionalism of the management team, the development of the market in which the company operates, the economic development of the country and the region, etc. There is a risk for investors due to the lack of a guarantee for annual dividends payment.

8.3.7. Risk of change in the tax treatment of investments in shares

The risk of changing in the taxation of investments in securities is linked to the change in the current taxation regime for such instruments. The latter may be considered favorable, as capital gains are tax-exempt. Changes in capital gains tax, as well as other potential changes in the taxation of securities' investments, may have a negative impact on the final realized net result by an investor.

8.3.8. Risk factors included in the Registration document

The specific risks associated with the core activity of Sirma Group Holding JSC, as well as the general risks that may have an impact on its activities, are detailed on pages of the Registration document, Section "Risk Factors".

9/ INFORMATION ABOUT EVENTS AND INDICATORS WITH INCREASED NATURE OF THE COMPANY, HAVING A SIGNIFICANT EFFECT ON THEIR ACTIVITY AND THEIR INCOME AND EXPENDITURE; EVALUATION OF THEIR IMPACT ON RESULTS IN THE CURRENT YEAR.

There are no events and indicators with an unusual nature for the company that have a significant impact on its operations and its realized revenues and expenses; assessing their impact on results during the current period.

10/ INFORMATION ABOUT OUT OF THE BALANCE SHEET TRANSACTIONS - NATURE AND BUSINESS PURPOSE, FINANCIAL IMPACT OF THE TRANSACTION ON ACTIVITY IF THE RISKS AND BENEFITS OF THESE TRANSACTIONS ARE ESSENTIAL FOR THE COMPANY AND THE DISCLOSURE OF THIS INFORMATION IS ESSENTIAL FOR ASSESSING THE FINANCIAL POSITION OF THE COMPANY.

There are no deals out of the balance sheet of the Company.

11/ ANALYSIS AND FINANCIAL EVALUATION OF THE FINANCIAL RESOURCES MANAGEMENT POLICY WITH THE POSITION OF OPPORTUNITIES FOR THE SERVICE OF THE OBLIGATIONS, THE EVENTUAL THREATS AND MEASURES WHICH THE COMPANY WAS PREVENTED OR PROVIDED TO TAKE FOR THE PURPOSE OF REMOVING THEM.

The management of financial resources is subject to the requirement of maximizing efficiency while respecting payment deadlines agreed with both suppliers and customers. This means a predominant use of own funds, resulting in lower financial costs and interest costs. On the other hand, there is a significant reserve of undrawn loans that can serve both current and investment costs, which maintain high liquidity of payments.

The entity's ability to service obligations is expressed in terms of liquidity ratios in the description of the liquidity risk in this report. As evidenced by the values of the liquidity indicators, Sirma Group Holding JSC has no problems in meeting its obligations, both in the medium and long term. The company has regular proceeds from sale, while also using bank overdrafts, which allows it to service its obligations by successfully managing its financial resources and to properly and timely service its obligations.
