1 STATEMENT BY THE BOARD OF DIRECTORS OF “SIRMA GROUP HOLDING” JSC

The present interim consolidated management of “Sirma Group Holding” JSC covers the period, ending on 30 September 2020 and was prepared in accordance with the provisions of Article 39 of the Accountancy Law and Art. 100o, para. 2 and 5 of the the Public Offering of Securities Act (POSA), including also the established events, occurring after the balance sheet date. The structure of this report is in accordance with Appendix 9, 10 and Appendix 11 to Article 32a (2) of Ordinance No. 2 of the Financial Supervision Commission (FSC).

The board of directors of the holding confirms that:

- there were no irregularities in which managers or employees were involved, which may be material to the consolidated financial statements;
- all material transactions are duly accounted for and reflected in the interim consolidated financial statements as at 30 September 2020;
- there is no actual or potential breach of laws and (or) other regulatory provisions which would have a material impact on the consolidated financial statements or could serve as a basis for reporting contingent loss;
- there are no legal or other restrictions on the flow of funds;
- there are no known trends, requests, commitments, events or occasional circumstances for which there is reason to expect that they may affect the company as a whole.

This management report contains estimates and information based on our beliefs and assumptions, using currently available information about them. Any statements contained in this report which are not historical facts are predictions. We have based these statements on the future of our current expectations, assumptions and predictions about future conditions and events. As a result, our predictions and information are exposed to uncertainties and risks, many of which are beyond our control. If one or more of these uncertainties or risks materialize or if the underlying management assumptions prove to be incorrect, our actual results may differ materially from those described in the report. We describe these risks and uncertainties in the report in the Risk Section.

This report includes IT industry statistics and global economic trends which come from information published

by sources including International Data Corporation (IDC), a market information and information technology consultant, telecoms and consumer technology markets; Gartner, the European Central Bank (ECB); and the International Monetary Fund (IMF). This type of data is only the forecasts of IDC, the ECB, the IMF and other data sources for the global economy and industry. SIRMA does not guarantee any statistical information provided by sources such as IDC, Gartner, ECB, IMF, or other similar sources cited in this report. In addition, although we believe that information from these sources is generally reliable, this type of data is inaccurate. We warn readers not to create unnecessary dependence on this data.

In our Interim Consolidated Management Report, we analyze our business activities for the reporting financial period as well as the current situation of “Sirma Group Holding” JSC. Starting from a description of our business, economic environment and strategy, we present our financial system and explain in detail our results and operations as well as our financial position and net assets. We also report on the various aspects of financial sustainability of Sirma Group Holding and the expected development of possible risks.

The financial information presented in this report includes our consolidated financial statements, our report to the Board of Directors and some financial aspects derived from our management accountability. The non-financial data presented in the report includes aspects of intellectual, human and social rights and relationships derived from our materiality assessment.

Our interim consolidated financial statements have been prepared in accordance with IFRSs. Internal control over financial reporting ensures the reliability of the information presented in the consolidated financial statements. Our Board of Directors has confirmed the effectiveness of our internal financial reporting.

All financial and non-financial data and information for the reporting period is collected and / or reported by the responsible business units.

The reporting period is the financial year ending on 30.09.2020. The report includes Sirma Group Holding JSC and all subsidiary companies of the group without Flash Media, Engview Systems Latin America, Eyeball Interactive, Excell Management and e-Dom, which are excluded from consolidation due to lack of relevance.

2 ORGANIZATION AND WAY OF PRESENTATION

"Sirma Group Holding" JSC is a holding company that invests in technological businesses, manages them strategically and operationally, provides its subsidiaries with management, administrative, marketing and financial services.

Tsarigradsko Shosse, No 135. The name of the company changed on 23.03.2009 from "SGH" JSC to "Sirma Group Holding" JSC.

The object of the company is: ACQUISITIONS, MANAGEMENT, EVALUATION AND SALE OF

PARTICIPATION IN BULGARIAN AND FOREIGN COMPANIES, ACQUISITION, EVALUATION AND SALE OF PATENTS, CESSION OF LICENSES TO USE PATENTS OF COMPANIES WHICH THE COMPANY HOLDS, FINANCE OF COMPANIES IN WHICH THE COMPANY PARTICIPATES, ORGANIZATION OF ACCOUNTING AND COMPILING FINANCIAL STATEMENTS UNDER THE LAW OF ACCOUNTING. THE COMPANY MAY PERFORM INDEPENDENT BUSINESS ACTIVITIES WHICH ARE NOT PROHIBITED BY LAW.

Changes in the statement of activity

At the time of its incorporation, the company operated under the following business activities: design, development, marketing, sales, implementation, training and support of software products and complete solutions, including software project management, information and communication technology consultancy services, accounting services, as well as any other activity not prohibited by law.

On 23.03.2009 Sirma Group Holding changed its scope of activity as follows: Acquisition, management, evaluation and sale of participations in Bulgarian and foreign companies, acquisition, evaluation and sale of patents, surrender of licenses for use of patents of companies in which the holding company participates, financing of the companies in which the holding company participates, organization of the

accounting and preparation of financial statements under the order of the Law for Accounting. The company may also carry out its own commercial activity, which is not prohibited by law.

From the establishment of the company until the date of this document, Sirma Group Holding JSC:

- is not the subject of consolidation;
- no transfer or pledge to the enterprise;
- No claims have been filed for the opening of insolvency proceedings of the company;
- There are no tenders from third parties to the Company or from the Company to other companies;

CAPITAL

The share capital of the company amounts to 59 360 518 BGN, divided into 59 360 518 dematerialized shares with nominal value of BGN 1.

History of Share Capital

History of changes in share capital

- The company was incorporated with BGN 50,000 of capital.

On 15.10.2008, after the adoption of three triple expert appraisals of experts, the share capital was increased from BGN 50,000 to BGN 77,252,478 through non-cash contributions and issuance of new 77,202,478 shares. Non-cash contributions are as follows:

- 1) 29 software modules worth 61,555,838 BGN;
- 2) Non-monetary contribution representing real estate amounting to 3 911 660 BGN:
 - Office building - offices, floor 3th and floor 5th of an office building, located in Sofia, 135 Tsarigradsko shose

On 22.10.2010. as a result of the decision of the regular annual general meeting of the Company's shareholders, a reduction of the capital of "Sirma Group Holding" JSC from

Blvd., owned by "Sirma Group" AD, a company registered in the Commercial Register at the Registry Agency UIC 040529004, with headquarters and address of management in Sofia, Mladost district, 135 Tsarigradsko shose Blvd., accepted as shareholder in "SGH" AD by decision of the General Meeting of "SGH" JSC from 10.07.2008

3) Non-cash contribution representing shares of 11 734 980 BGN:

□ A total of 81,690 shares of the total amount of 11,734,980 BGN (143.6526 BGN per share) of the capital of "Sirma Group" JSC, registered in the Commercial Register at the Registry Agency UIC, 040529004

77 252 478 BGN to 73 340 818 BGN was recorded through the cancellation of 3 911 660 shares with a par value of 1

BGN each. The Company's capital was reduced on the basis of Art. 200, para. 2, in conjunction with Art. 187f, par. 1, item 2n of the Bulgarian Commercial Law.

During the transformation, entered in the Commercial Register on 23.10.2014, the Company's capital is reduced to 49 837 156 through the cancellation of 23 503 662 shares.

This decrease is a result of the estimated fair value of the shares of Sirma Group Holding JSC by three independent appraisers. The shareholder structure of the Company does not change as the shareholder structures of the transforming and that of the newly established companies are mirrored.

On 30.10.2015, after a successful initial public offering, the capital was increased to 59 360 518 BGN by issuing 9 523 362 new shares with nominal value per share 1 BGN and issue value 1,20 BGN.

Information on the terms of any vesting rights and / or liabilities for statutory but unissued capital

Sirma Group Holding JSC does not have information about the terms of any acquisition and / or liabilities for statutory but unissued capital.

5 SIRMA GROUP IN Q3 2020

5.1 The business

Established in 1992, Sirma has become one of the largest IT companies in the region for 27 years, owning a range of proprietary, innovative technologies, a diverse product portfolio and growing market share in Europe and North America.

Sirma owns software solutions for a wide range of businesses with a focus on the development of cognitive technologies (AI). The Group has diversified market exposure exclusively to the private sector with a stable customer portfolio. Sirma's products are concentrated in the most promising and high-tech areas - financial technology, semantics, industrial software, IoT, computer vision, medicine. In 2017, as part of its renewed strategy, the group began a focused effort to build cross-selling capacity, updated its sales and marketing model in line with the global trends.

Sirma is a globally recognizable company in semantic technology and among the top 10 worldwide in the areas of Graph Databases (GrahDB), Text Analysis, Data Detection, and Federation (Bloor, 2016). One of Sirma's products - EngView Package Designer Suite CAD is part of the design and packaging solutions of world leaders in the printing industry. The Holding is one of the regional leaders of the IT market, with 60% of the operators in the financial sector being its clients. Sirma is a top class regional cloud service provider with Class 4 Data Center licensed to store data from the Bulgarian National Bank and other organizations requiring increased data security. Through one of its companies, the Holding is the leader in the SaaS delivery to insurance brokers. Sirma has a strong presence on the US market by running a huge number of IT consulting projects. The group has a broad partner and distribution ecosystem in over 50 countries around the world.

Some of Sirma's unique advantages are:

- The Best RDF Triplestore in the World;
- Top Text Analytics Engine for Business (used by BBC, AstraZeneca, Ministry of Defense USA);
- Face recognition technology - among the top 10 worldwide;
- Extensive expertise in news and social media analysis;
- Extensive expertise in creating Chatbot and AI Assitant applications.

In 2017, the group developed its 5-year "Sirma 2022 Strategy". Sirma focuses on the process of transforming organizations into "intelligent organizations." We have technology and know-how for all stages of this transition - from data collection - internal, external, structured, unstructured, open, connected, "dark" etc., through the development of models and knowledge repositories, the development of analytical models and predictive models based on artificial intelligence, to the provision of "human" interfaces of the next generation.

The main elements of the Strategy are:

- Technological transformation through concentration of R&D;
- Improvement of the commercialization of technologies;
- Expansion and technological leap in Sirma's product portfolio through:
 - o Cloud base;
 - o Development of new products with a cognitive element;
- Complementing the sales model - from predominantly on premise to SaaS sales;
- Significant expansion of the distribution network and partner ecosystem to improve the sales model - in addition to direct sales and sales through a major affiliate distribution network, including increasing OEM partnerships;
- Organizational restructuring to implement the strategy.

The transition to the SaaS sales model, the increase of cognitive sales, combined with planned marketing and sales investments will ensure a smooth and steady growth of Sirma to a global level and an increase in the value of the Group.

Our philosophy about our strategic technologies and products is that we embody the sense of human thought - perception, interpretation, forecasting and decision making.

By adopting the 2018-2022 Strategy, we began preparing for its implementation. We provided debt finance to eliminate minority holdings in Ontotext - a key company for the Strategy implementation. We have developed detailed development plans for the strategic verticals of the group. We have begun a process of organizational and technological restructuring.

5.2 Economic Trends

In short

The global economic development expectations for decline in 2020 have been reduced (smaller decline), while expectations of recovery in 2021 have also been wound down (slower recovery). Despite of the COVID recession some ICT sub-segments are growing even in 2020. The "average" figures mask a huge variety in IT spending – on technology, geographically and by vertical. A K-shaped recovery in the ICT sector is expected in the period 2020-2024, with technologies facilitating digitalization of businesses leading the sector with double digit growth in the post-COVID years.

Development of the economy in Bulgaria in 2020 and expectations for 2021

Following grim forecasts until the middle of 2020 for the economic decline in Bulgaria reaching a GDP drop of 7.2% ([06.05.2020, Spring Report the European Commission](#)) in October outlook is revised envisioning a more modest decline. As per the [Bulgarian National Bank Macroeconomic Forecast](#) (published on Oct.13, 2020) although facing significant risks in the future the GDP of Bulgaria is expected to decline by 5.5% in 2020 (an upward revision of nearly 3% from the forecast from the previous quarter). The contributing factors to the decline are a curb in consumption by 1.9%, decreased fixed capital formation of 1.8% and the reduced exports by 1.2%.

Fiscal policy is expected to have contribute significantly to the economic activity through government spending, investments and increased net transfers to households. The gradual recovery, which started in the third quarter of 2020 is expected to continue through 2021 and 2022 with GDP growth of 4.0% and 3.8% respectively, reaching pre-pandemic levels in mid 2022. The most important risk to the economic activity is seen in a potential second wave of COVID-19 in Bulgaria and across the world, which could subdue for a longer than expected period foreign trade, private and corporate consumption and investments. The recovery of the Bulgarian economy is highly conditional and depends on the measures taken at local and European level, as well as on the recovery of European economies, which are also the leading markets for Bulgarian industry.

Development of the global economy in 2019 and expectations for 2020

Global recession

The first nine months of 2020 were marked by the impact of the measures against COVID-19 on the world economy and the recession in which most countries fell. Market forecasts in the **first half of the year** outlined a sharp economic decline and an uncertain recovery in future years ([Global Economic Prospects, World Bank, June 2020](#)).

However in October 2020 the IMF has found grounds for cautious optimism and has revised upwards its June forecast ([World Economic Forecast 2020, IMF, 14 October,2020](#)). The revision was driven by second quarter GDP outturns in large advanced economies, which were not as negative as initially predicted and where activity began to improve sooner than expected after lockdown scale back. "Outturns would have been much weaker had it not been for the swift, sizable and unprecedented fiscal, monetary and regulatory measures which maintained disposable income for households, supported cash flow for firms and maintained credit provision. Collectively these measures have so far prevented the catastrophe of 2008-2009."

According to the International Monetary Fund ([World Economic Outlook, 14, October 2020](#)), Global growth of GDP is projected at -4.4% for 2020 (compared with -5.2% from their June forecast). Growth in the advanced economies is projected to be -5.8% in 2020 (a revision of 2.3% from the June forecast), reflecting the better than anticipated US and Euro area GDP outturns in the second quarter of the year.

The IMF projects a V shaped recovery with Global growth reaching 5.2% in 2021 (which is 0.6% higher than that of 2019). The rebound in 2021 is expected to gradually slow pace in the coming years to about 3.5% annual growth in the years 2020-2025. Growth in the advanced economy group is forecast to strengthen to 3.8% in 2021 (reaching GDP output of 2% lower than 2019 levels).

The Industry of Sirma

The companies from Sirma Group specialize in the information technology (IT) industry. Industry data is usually combined with data for the 'communication segment', as this segment is entirely dependent on information technology. Respectively, the industry acquires the name "Information and Communication Technologies" or ICT for short. Of all the diversity of ICT segments, the companies in the group work mainly in the segments "IT services" (system integration, infrastructure as a service, software as a service, software support, consulting) and "Business software" (different software products aimed at different business verticals and custom software development).

The two big segments ("IT Services" and "Software") in which the Group operates have been the fastest growing in the past and also the most resilient during the COVID crisis (see Gartner "The big picture" below). They will return to growth reaching pre-COVID levels as soon as 2021. CAGAR is anticipated to be 4.6% for "IT Services" and 7.9% for "Software" for the period 2020-2024.

However the Big-picture forecast for growth of these segments masks the underlying diversity of sub-segments and their true potential in 2020 and the coming years. The

“Intelligent evolution of enterprises” business line of Sirma is growing even in 2020 and is expected to sustain double digit growth for the period 2020-2024 (see Gartner “Detailed forecast” below). The mission of Sirma is to facilitate the intelligent digital transformation of enterprises. All daughter companies within the Group are doing just that. These IT technologies and services are the ones which are gaining momentum from the COVID crisis and will continue to lead the growth of the whole IT sector.

Geographically Sirma is focused on the leading global markets (USA, UK and Europe) which are also expected to make the fastest return to normal pre-COVID spending on IT as early as 2021 (see Gartner “The Big Picture” below).

Sirma is a B2B IT provider. The client portfolio of Sirma – Digital businesses (Sirma’s AI, Consulting and Integration, Chatbots, IT Security and software development), Financial institutions (Sirma’s AI, Consulting, Integration, IT Security, Chatbots and Sirma Business Consulting Products), Insurance (Sirma’s Insurance Broker Platform), Communications (Sirma’s AI, GraphDB), Publishing (Sirma’s AI, GraphDB), Media (Sirma’s AI, GraphDB) and Healthcare (Sirma’s AI, Sirma Medical products) have shown modest decrease in IT spending levels in 2020, are showing resilience during the COVID crisis and are expected to grow strongly their investments in ICT in the near years (see Gartner, ICT Spending by Verticals). Sirma does not have exposure to worst hit by the COVID crisis verticals – “Transportation”, “Manufacturing” and “Leisure”.

Forecast for the Global ICT Sector in 2020

Gartner

According to Gartner ([IT Spending Forecast 3Q 2020, October 14, 2020](#)), global ICT spending in 2020 will decline by 5.4% (a positive revision from the June anticipation of an 8% decline) compared to 2019 and will shrink to USD 3.6 trillion. All segments are expected to decline in 2020, with “Devices” experiencing the largest contraction.

The Big Picture

The second wave of COVID-19 is now evident with a possible third wave coming near the end of the year. However Gartner does not expect massive country-level lock downs, but rather local “hot-spot” management. Never the less expectations for ICT spending across the world are for a drop in ICT spending in all countries excluding China (where a 1% growth is anticipated in 2020).

Gartner has revised its ICT spending forecast and expectations in October 2020:

Global ICT Spending in Current Prices

	2017	2018	2019	2020	2021	2022	2023	2024	CAGR 2019-24
Data Center Systems

Growth y/y		8.81%	4.13%	-6.84%	4.79%	6.62%	7.35%	7.55%	4.63%

Detailed Forecast

However David Lovelock – VP Analyst at Gartner suggests a **K-shaped recovery** in the ICT spending, where some sub-segments are doing well and even strongly growing even during 2020, while other ICT technologies are fading off. The joint forecast anticipates a return to pre-COVID levels of ICT spending in 2021 in most developed countries.

According to David Lovelock from Gartner ([May 2020](#)), recovery will be slow and incomplete in 2020. The hardest hit industries such as tourism, air transport, entertainment and heavy industry will return to the levels of IT spending from 2019 only after 3-4 years.

The leading technologies starting from 2020 and moving the whole segment to the future are technologies which facilitate the businesses shift towards digital business and transformation – “business intelligence platforms”, “intelligent platform as a service”, “storage management”, etc. They have been growing in 2020 and will continue to grow with double digit rates in the period 2020-2024. The main driving force of ICT spending is a shift to digital business (the companies who are doing digital business are outperforming the ones that have not yet finalized their digital transformation). Hence spending on digital business

technology and transformation is growing in 2020 and will increase strongly in the years to come. Digital business is considered as “extinction level event” – “if I do not have digital business I will not be in business” (Gartner, October 14, 2020). Spending here is no longer linked with ROI.

The technology which is being abandoned is mapped to the left and bottom of the chart – “consumer desktops”, “business desktops”, “enterprise WLAN controllers”, etc. Spending in these segments is decreasing and they will never recover from the COVID crisis.

ICT Spending by Verticals

The drop in ICT spending in 2020 is not even across the various industry verticals. Some (“Government”) have even been able to grow during the year. Others (“Banking and Securities”, “Healthcare Providers”) have marked only a modest decrease compared to some who have marked a dramatic drop – “Transportation” with a decrease of 20% and “Manufacturing” with a decrease of 15%

Digitalization and investments in IT is seen as key in the post-COVID recovery. IT is no longer subject to cost cutting, but rather as key investments for organizations.

5.3. Additional information for Q3 2020**IMPACT OF EXCLUSIVE FACTORS**

The information in this report is not affected by the presence of exceptional factors.

SUMMARY INFORMATION RELATING TO THE STATE OF WHICH THE COMPANY DEPENDS ON PATENTS OR LICENSES, INDUSTRIAL, COMMERCIAL OR FINANCIAL CONTRACTS OR FROM NEW PROCESSING PROCESSES

Sirma Group Holding is not dependent on patents or licenses, industrial, commercial or financial contracts, as well as new production processes.

For all employees of the Company, it has the appropriate licenses for operating systems and application software for PCs and servers required for the normal workflow.

INFORMATION, CONCERNING SIGNIFICANT FACTORS, INCLUDING NON-ORDINARY OR RARE EVENTS OR NEW DEVELOPMENTS, THAT EXPRESSLY RENDER THE INCOME OF THE COMPANY'S ACTIVITY

There are no significant factors, including unusual or rare events or new developments that materially affect the Company's revenue and future investments.

SIGNIFICANT CHANGES IN NET SALES OR REVENUES DISCLOSED IN THE ACCOUNTS

Significant changes in net sales or earnings reported in the Company's accounts detailed in Section 9 of this Report are observed during the period considered.

INFORMATION ON GOVERNANCE, ECONOMIC, FISCAL, MONETARY POLICY OR POLITICAL COURSE OR FACTORS THAT SIGNIFICANTLY HAVE BEEN CONCERNED OR MAY CONTRIBUTE TO SIGNIFICANT, DIRECT, OR CONSEQUENTIAL ACTIVITY OF THE COMPANY

During the period under review, there were no factors of government, economic, fiscal, monetary or political factors that had a significant impact on the company's operations.

The main factors that may affect the Company's operations and how it manages the risk are described in the Risk Factors of this document.

5.4. Major news in Q3 2020

The following events and business news took place in Q3 2020:

30.09.2020

Mr. Tsvetomir Doskov – Executive Director of Sirma Business Consulting takes part in the Tech of Tomorrow 2020 discussions on the topic of "Real-time banking – accelerated shift to digital interaction."

29.09.2020

Mr. Fabrice Gouttebroze, Managing Director of S&G Technology Services, part of Sirma Group, shares insights to wealth managers in their choice of open banking solutions in the "Professional Paraplanner" magazine.

21.09.2020

Publication of the interim consolidated financial reports of Sirma Group Holding JSC for the period ending on 30.06.2020.

18.09.2020

Publication of the Protocol from the General Meeting of Shareholders of Sirma Group Holding JSC and the lists of proxies.

17.09.2020

Disclosure of the decision by the GMS for distribution of the profit for 2019 of Sirma Group Holding JSC and lack of payment of dividends.

17.09.2020

Disclosure of information about the buy-back of own shares by Sirma Group Holding as per decision of the GMS.

16.09.2020

Sirma Group Holding held its annual General Meeting of the Shareholders using the online platform EPOS of the Central Depository.

08.09.2020

Mr. Fabrice Gouttebroze - Managing Director of S&G Services/Sirma UK has discussed for FinTech Magazine, the financial industry's focus on digital offerings and the increased demand from consumers to use them, due to the COVID-19 pandemic.

31.08.2020

Disclosure of the interim individual financial statements of Sirma Group Holding JSC for the period ending on 30.06.2020.

27.08.2020

Publication of information about the new requirements and possibilities of EPOS and the electronic option for conducting the GMS.

25.08.2020

The Managing Director of S&G Technology Services /Sirma UK/, Fabrice Gouttebroze has discussed the current trends in consumer and business lending, driven by the COVID-19 lockdown and its effect on the economy, on [Global Banking And Finance Review](#) magazine.

24.08.2020

Sirma AI's product GraphDB is named Champion in Bloor's Graph Database Market Research.

17.08.2020

Publication of the interim consolidated financial statements of Sirma Group Holding JSC for the period ending on 31.03.2020.

14.08.2020

Disclosure of considerable share participation of the shareholder Ivo Petrov, which has reached 5.03% of the capital of Sirma Group Holding JSC.

13.08.2020

Publication of the Invitation for the GMS of Sirma Group Holding JSC on 16.09.2020 and the respective documents for the meeting.

05.08.2020

Sirma organized a round table on the topic Banking innovation in times of pandemic: "Mission Possible".

03.08.2020

Re-publishing of the annual audited consolidated reports of Sirma Group Holding JSC for 2019 due to a technical issue with 3 files and official information on the occurrence.

31.07.2020

Disclosure of the annual audited consolidated reports of Sirma Group Holding JSC for 2019.

31.07.2020

Disclosure of extension of the date for publication of the interim consolidated financial statements of Sirma Group Holding for the first quarter of 2020 until 31.08.2020.

28.07.2020

Version 4.1 of the Medrec:M product is launched by Sirma Medical Systems JSC.

16.07.2020

Sirma Group Holding is holding prestigious places in many categories in the Top 100 Bulgarian ICT Companies ranking of ICT Media.

30.06.2020

Extension of the date for publication of the audited consolidated statements of Sirma Group Holding for 2019 until 31.07.2020.

17.06.2020

Announced new strategic partnership between Sirma AI and Semantic Web Company.

29.05.2020

Disclosure of the interim individual financial statements of Sirma Group Holding for the period ending on 31.03.2020.

21.05.2020

Sirma Group Holding is included in the Equity Research Program of the EBRD.

19.05.2020

Sirma Business Consulting, part of Sirma Group Holding, announced its new strategic partnership with Madara Invest for an innovative fintech project.

15.05.2020

Disclosure of annual audited individual financial reports of Sirma Group Holding for 2019 in English.

07.05.2020

Sirma Group provided its application for telemedicine Medrec:M free to the Sofia Municipality and its Department of Innovations.

05.05.2020

Disclosure of annual audited individual financial reports of Sirma Group Holding for 2019.

22.04.2020

Sirma AI, part of Sirma Group Holding, provides its GraphDB for free to scientific organization around the world, who are fighting COVID-19.

16.4.2020

Launch of version 2.0 of the application Medrec:M.

15.04.2020

Disclosure of extended terms for disclosure of the financial reports of Sirma Group Holding and the respective dates.

09.04.2020

Statement by the CEO of Sirma Group Holding Tsvetan Alexiev about the future of telemedicine and Medrec:M.

06.04.2020

Launch of the mobile app Medrec:M – the personal medical record of the future.

02.04.2020

Disclosure of extended terms for disclosure of the individual audited reports for 2019 of Sirma Group Holding due to the COVID 19 imposed restrictions.

26.03.2020

EngView, part of Sirma Group Holding, provides free home-office licenses for home-office use for its product EngView Package and Display Designer Suite during the Coronavirus outbreak.

24.03.2020

Daticum, part of Sirma Group Holding, donates cloud servers for online class rooms.

24.03.2020

Sirma Medical, part of Sirma Group Holding, provides for free the full functionality of its Premium package of its product Diabetes:M during the Coronavirus restrictions.

18.03.2020

Disclosure of the impact of COVID 19 on the activity of the companies within "Sirma Group Holding" JSC.

04.03.2020

Sirma launches the first Bulgarian product, which is fully compliant with PSDII – The Open Banking Suite.

02.03.2020

Disclosure of interim consolidated financial reports of "Sirma Group Holding" JSC as at 30.12.2019.

26.02.2020

Sirma takes part in the Annual FinTech and InsureTech Summit.

20.02.2020

Sirma discloses strong annual results of its UK company S&G Technology Services.

30.01.2020

Disclosure of interim individual financial reports of "Sirma Group Holding" JSC as at 30.12.2019.

5.5. Main legal information in Q3 2020

Transactions with shares for the period 01.01.2020 - 30.09.2020:

- **Acquisition of more than 5% share of the Company's capital by a shareholder.**

On 14.08.2020 the office of Sirma Group Holding JSC received a notification from the investment intermediary FFBH AD, Sofia for significant share participation and acquisition of more than 5% share of the company's capital by their client, as follows:

- Name of the shareholder holding 5% or more of the voting rights: Ivo Petrov Petrov
- Date on which the voting right of the person has transferred the thresholds under Art. 145, para 1 of LPOS: 10.08.2020
- Total sum of voting rights of Ivo Petrov Petrov: 2 960 570 voting shares or 5,03% of the company's capital

Litigation for the period 01.01.2020 - 30.09.2020:

There are no lawsuits filed against the company for the period.

5.6 Information for contracted large transactions in Q3 2020

In Q3 2020, the company made several large contracts with customer and subcontracts, in connection with the new strategy of the Group:

Purchases:

- Deal 1 for BGN 4 562 thousand
- Deal 2 for BGN 2 366 thousand
- Deal 3 for BGN 2 153 thousand

Sales:

- Deal 1 for BGN 5 523 thousand
- Deal 2 for BGN 2 624 thousand
- Deal 3 for BGN 2 275 thousand

5.7 Information of the used financial instruments in Q3 2020

In Q3 2020 the company has not used any financial instruments.

5.8 R&D activity of the company in Q3 2020

The strategy for growth and development of Sirma Group Holding JSC forsees the concentration of the intellectual property of the Group in the Holding company. This concentration also implies the concentration of the Group's research and development activities at Sirma Group Holding JSC. Implementation of this process started in 2018.

The total value of the investments made in research and development in Q3 2020 amounts to BGN 1 880 thousand.

5.9 Possible future development of the company

At the beginning of 2020, due to the spread of a new coronavirus (Covid-19) worldwide, difficulties in the business and economic activity of a number of enterprises and entire economic sectors appeared. On 11 March 2020, the World Health Organization also announced the presence of a coronavirus pandemic (Covid-19). On 13 March 2020, the Bulgarian government declared a state of emergency for a period of one month, which was subsequently extended numerous times and introduced a number of restrictive and protective measures for business and people. The situation and the measures taken by the state authorities are extremely dynamic, but at the moment the management of the Company believes that they will not have an effect on the activities of the Company.

The Company reports liabilities on received loans. The Company does not expect a reduction in its revenues to such an extent that this will affect the ability to repay its current liabilities on loans received.

5.10 Contracts under Art.240b of the Commerical Code in Q3 2020

During Q3 2020 the company has not been notified for contracted transactions with the members of the Board of Directors or parties related to them, which fall outside the line of activity of the company or the terms of which differ substantially from the current market.

6 RESULTS BY COMPANY

DATICUM

- <https://www.daticum.com/>
- **Datium JSC is a subsidiary of Sirma Solutions AD**
- **Capital:** BGN 2 302 049 divided into 2 302 049 registered materialized shares with a nominal value of BGN 1 with the right to vote, the right to dividend and a liquidation share according to the participation in the capital. Sirma Solutions JSC holds 1 392 740 shares or 60.5% of the capital.

In the beginning of 2009, Daticum was transformed from a business unit of Sirma Solutions AD into an independent company, attracting financing from Asarel Medet AD.

The company operates as a center for reliable data storage from the highest possible generation. The main services it provides are cloud services, including public and private, colocation, hosting, virtualization, hardware rental, communications and network services, the construction and operation of backup data centers, archiving and storage of information, provision of services for building and maintenance of hardware and software systems, building of data centers, system integration, building of test environments, etc.

The robust expertise in the field of building and providing public and private cloud computing platforms has contributed to the growth of the company's business and has a positive impact on both revenue and profits. In 2018, Daticum designed and successfully migrated computational activities from conventional architecture to cloud platforms for multiple customers, as well as customers who have decided to purchase the necessary computing equipment independently.

Daticum is certified by Microsoft and has the right for Bulgaria to provide the full range of Microsoft products, paid on a monthly basis according to the customer's requirement (Certified Microsoft SPLA Provider). All customers can rent any Microsoft product from Daccum for as long as they need this product and use storage volume and computational resources which they actually consume. This partnership opens the possibility for all developers and system integrators who operate on the territory of Bulgaria and use Microsoft products in their solutions to be able to provide these solutions to their clients as a service in the only legal way possible, namely through a Microsoft SPLA partner on monthly basis, without having to invest in tangible fixed assets for computational resources or purchase of licenses.

Daticum is certified as VMWare Service Provider, which also provides it with the only legal opportunity to provide public cloud services as well as private cloud rental solutions using the latest VMWare technology.

Daticum is increasingly reoriented from a company providing basic collocation services to client equipment, to a company providing services on a monthly basis with high added value.

MAIN MARKETS:

Bulgaria, North and South America, Europe

MAIN CLIENTS:

The main clients of the company are the following industries - insurance, ICT, utilities, media and information services, industrial production, wholesale and retail, transport and courier services.

MAIN COMPETITORS:

Neterra OOD, Evolink AD, Teleponet OOD, 3DC EAD and international companies providing cloud services such as Amazon, Rackspace, Microsoft, IBM and others.

BUSINESS MODEL OF THE COMPANY

The Company's core business model is to build infrastructure to provide computing resources for data processing and storage and to provide these resources for a fee to a wide range of customers who prefer not to maintain such infrastructure or have a temporary need for these resources.

RESOURCES OF THE COMPANY

The company has the necessary resources and is able to invest in the development of its business without using debt capital.

NEW PRODUCTS, NEW BUSINESS OR BUSINESS MODELS FOR THE PERIOD

The company focused on consolidating its market positions and expanding its IaaS and PaaS cloud services. Thanks to our partners, we can now offer a new Remote Backup as a Service, through which we can back up our data center data from client servers and end user devices regardless of their geographic location. In the next reporting period, we will develop and offer a Key Management Software as a Service in relation to meeting GDPR requirements. Along with the increasing tendency of customers to use leased computing resources on a monthly use basis, there is a similar tendency on the part of the company's suppliers to switch to business models for the provision of licenses and services based on monthly consumption.

HR POLICY

Preserve current staff. Maintaining and increasing its qualification through training, courses and participation in affiliate programs. We perform a selective increase in staff, following requirements arising from the increase in the volume of activity. Staff costs are rising in line with an increase in business volumes by up to 10-15% per year.

DATICUM IN Q3 2020**BUSINESS DEVELOPMENT IN Q3 2020 AND REALIZATION OF THE INVESTMENT PLAN**

- In Q3, Daticum's business development, as expected, encountered difficulties and reduced its growth rate, caused by the consequences for the economy of the epidemiological situation.
- A decision was made to modernize the infrastructure of the Data Center in order to further ensure and guarantee the reliability of the services provided by Daticum. A significant investment in a new diesel generator equipment was made.
- Significant increase in the capacity of the company's cloud platform. The investment is aimed at meeting the needs of customers for more resources and the ability to seamlessly provide even larger information systems, which in turn require huge amounts of computing resources.
- We have created a special policy in which all our clients who experience difficulties and financial problems during this crisis period have received an unconditional reduction in fees. This reduction was not subject to any additional aggravating conditions. Daticum's idea was to help anyone in difficulty with whatever it could. Subsequently, we received many letters of thanks from customers. This gratitude makes us believe that our policy is right and will have a positive effect in the long run;

NEWS

- During the epidemiological situation, Daticum contributed to society as a socially responsible company and

provided cloud services to a partner completely free of charge, in order to provide their educational platform providing remote learning for students during the state of emergency.

IMPORTANT EVENTS

- COVID - 19 and the events resulting from the state of emergency changed the plans of many of our current and potential customers, which began to affect the company's revenue

FORECAST FOR 2020

- Given the global economic situation created by the pandemic of COVID-19 and the fact that we are part of a service industry to other industries and the shrinking of certain sectors such as automotive, transport, retail and tourism, affects our business in a negative way. Revenues from services are expected to be maintained compared to 2019, despite the planned standard 10-15% growth per year in the company's initial plan.
- Cloud services will continue to grow in volume, moving along with the expected global growth of the IaaS market in 2020, but the pace will be slower than previously anticipated.
- The company is revising its business plan for 2020 and is ready to make a new revision with a clear horizon for more correct planning.
- At the moment we do not plan to reduce revenues or financial indicators of the company compared to 2019, but growth is threatened by the economic situation caused by the pandemic

SIRMA SOLUTIONS IN Q3 2020:

General information

"Sirma Solutions" JSC is a global provider of complex software systems, IT consulting and system integration, in various industrial verticals. Founded in 1992, the company is the largest in Sirma Group Holding JSC. Since its inception, Sirma Solutions has developed organically, thanks to the unique combination of innovative spirit, solid technology expertise and business flair.

The company specializes in the creation of corporate software systems and solutions, system integration and IT consulting for both specific industries and multi-industrial solutions. Sirma Solutions JSC is among the leading Bulgarian software developers, thanks to its excellent reputation, proven expertise and comprehensive know-how used in software product development and the successful implementation of numerous complex projects for clients on a regional and global scale.

Sirma Solutions also specializes in hardware delivery, infrastructure development, cloud services and virtualization.

The company maintains excellent relationships with leading software and technology vendors for the fastest growing industries, as well as independent software companies. Also, there are excellent interactions with the other holding company, which ensures the successful realization of projects, regardless of the degree of complexity. Depending on the size and complexity of a project, the company has access to an expanded range of resources from over 500 people.

Sirma Solutions is Microsoft Gold Partner, IBM Advanced Partner, Oracle Gold Partner, HP Preferred Gold Partner, and so on. The company is certified to ISO 9001: 2015 and ISO 27001: 2005 to meet the regulatory and contractual

requirements in terms of security and data integrity and IT management.

BUSINESS ACTIVITY OF SIRMA SOLUTIONS AD IN THE THIRD QUARTER OF 2020

Business activity in the third quarter passed again under the sign of the pandemic of COVID-19. The company has taken a number of measures to preserve the health of employees and prevent the spread of the infection. We switched entirely to remote operation mode. The main goal of the company was to keep the jobs of all employees to prevent shrinking the company's potential. The next goal for the third quarter - to find new projects and tasks in order to rationally use human resources - was also successfully achieved. Although the company did not make layoffs and did not lose staff, at the end of the quarter we are very active in the labor market and have dozens of open engineering positions. An excellent logistics organization for remote work was created - mobile devices, secure remote access and regular online meetings of project staff and company management.

Market in North America

The business activity in the first half of the year was completely subordinated to the COVID-19 pandemic. The company has taken a number of measures to preserve the health of employees and prevent the spread of the infection. We switched entirely to remote operation mode. The main goal of the company was to keep the jobs of all employees to prevent shrinking the company's potential. An excellent logistics organization for remote work was created - mobile devices, secure remote access and regular online meetings of project staff and company management.

Over the years, Sirma has managed to build an excellent name on the market for software services in the United States, as the teams in Bulgaria and the United States manage to deliver quality on time without a failed project. This leads to a high percentage of loyal sustainable business (over 80%). We believe that our existing contracts are low to medium risk for continuity or in other words, we do not

expect existing customers to change our services with other competing companies.

During the first half of the year, based on our work with cloud platforms and real-time big data analysis - Kanin.io, in collaboration with the American company PureInfluencer, we managed to build and launch an application that monitors and classifies real-time Web visitors to car dealerships, which allows car dealers to sell cars and services in real time online. The software was shown at NadaSHow 2020 in Las Vegas and has the first 100 customers already. The team continues its development work by updating the current PureInfluencer platform, with the goal of releasing the new version at the end of the year.

The third quarter passed without any additional shocks in our projects in North America. Given that the global market in the United States collapsed by a double-digit rate at the beginning of the pandemic, the main goal of the company, which we successfully fulfilled, was to keep all customers in this market despite the difficulties they are experiencing. We approached each client personally, listened to his problems caused by the pandemic and offered a personal solution to each one, so as not to allow a complete termination of contracts, but to remain in an active position and gain loyalty. The pandemic itself, the remote mode of work of the people in North America, has created additional opportunities for us as an IT company, which we have successfully implemented in projects.

European Market

In the European market, the main problems for our customers caused by the pandemic revolved around the organization of the new mode of operation. In this market, there was no contraction in the work of existing customers, but the plan for the growth rate of new sales was revised. The new contracts have been delayed, but in Q3 this process will be catalyzed and the business plans are currently being implemented successfully.

The European part of the business of the professional services company in Q3 continued to work on active projects from 2019.

In the financial sector, two main projects are being implemented:

- Implementation of an open banking solution in a large European bank;

- migration of IRIS to UBB, part of the project for software unification of SiBank and UBB under the KBC brand;

In the retail sector, the company managed to implement and publish mobile applications for KFC Bulgaria, which allow consumers to order food online. The application turned out to be very timely, because in March, with the introduction of

quarantine, more and more users began to look for opportunities to order food online and the use of this type of application is an additional sales channel.

During the same period, a new kiosk application for the Metro marketing department was developed and launched in the form of a game that allows users to win prizes, discounts and vouchers upon purchases in the store. For the period before the quarantine, over 6,000 users a day used the application in the 11 Metro stores across the country.

In the field of cultural heritage, in Q3 we continued to work actively with the museums that use our systems, including the National Gallery of Art (Washington DC), Van Gogh museum (Amsterdam), and others.

During the period, the marketing and sales departments traditionally focused on financial services and artificial intelligence, where Sirma considers itself as a regional leader. These efforts opened several opportunities for launching new projects in this field, which slowed down at the end of March, given the situation around the global pandemic.

In the third quarter we managed to sign several contracts for the execution of orders, some of which in Bulgaria. As a result, by the end of the quarter, all the engineering resources of the company were associated with projects, and we again entered a mode of staff shortages and high activity in the labor market.

Public sector

In the public sector during Q3 2020 the active work on the big long-term projects won in 2018 and 2019 continued:

- the gradual establishment of the overall IS for management of the Financial Mechanism Office (EEA Grants, Brussels),

- the development of the Rating System of the higher schools of the Ministry of Education and Science

- the gradual construction of the IS MusIT for managing the activities of MusicAuthor

- the gradual construction of CAIS EOP of PPA

- development of two important IS of the State Enterprise ATC

The provision of warranty and out-of-warranty support for all key state-owned IT systems, developed by us, continued:

- the complete operating system eBDZCargo of BDZ-Freight (BDZ is the Bulgarian abbreviation of Bulgarian State Railroads)

- the overall IS of the NCRRP, which maintains the registers of health care and plays a key role in the field of e-health,
- IS of the Prosecutor's Office, etc.

During the period, intensive work continued to win new projects in the sector, but the situation Covid-19 led to a serious change in the circumstances and plans of almost all contracting authorities, and at present it is very difficult to make an accurate forecast for development by the end of the year.

Many of the prepared large and medium-sized projects were put on hold or completely discontinued and only some small urgent projects were continued. As a result, only a few smaller new projects were launched during the period, such as the project to automate the verification of the circumstances stated by the parents in the ISODZ and PGU of the Sofia Municipality, the results of which needed to be achieved as soon as possible

A serious risk is the possibility of stopping any of the currently developed projects, but at present, through intensive dialogue with the contracting authorities, this risk is minimized as far as influencing it is within our capabilities is possible.

No downsizing of the teams was allowed, but Covid-19 changed the way of working, which necessitated internal team reorganizations in order to maintain the quality of services provided to our customers - a task in which we believe to have succeeded.

Despite the difficult situation, the efforts to revive some of the frozen / suspended projects and to find new ones continue and will continue, with the focus on projects that are of great importance for the activities of the respective contracting authorities. But it is expected that these efforts, if successful, will yield results no earlier than the end of this or the beginning of next year, making growth plans in the sector almost impossible to achieve. At present, the aim is to maintain the current situation and prevent a decline.

System integration

By the end of Q3, the System Integration Department achieved and exceeded its revenue targets, to win numerous deals in the current customer base, managed to expand its customers with two new large companies, and managed to win two public projects. No contraction of the planned value added for the quarter was allowed..

During the period we created new partnerships and were certified to represent our partners, sell their products and integrate their software into solutions for our customers, including companies such as:

- AppDynamics
- Veracode
- SolarWinds

We highlight some of the more interesting projects in the 0.5-2M BGN range, completed by the end of Q3 2020:

- First project for Application Performance Monitoring with our partners AppDynamics recently acquired by the giant Cisco
- Project with our F5 partners in the field of information security
- Project with our Veracode partners in the field of information security
- Delivery of large storage systems in several data centers in Europe with our partners from HPE
- Delivery of personal devices for two of the leading banks in Bulgaria
- Contract for maintenance of all Cisco devices in the data centers in several countries on 3 continents for a large international company
- We have successfully completed the migration of all NHIF systems to Oracle Cloud delivered by us and located in Bulgaria to meet all security requirements
- We have delivered hundreds of personal mobile computers for the needs of our customers going into remote operation.
- A new three-year contract was signed for updating and maintaining the virtualization software in all data centers of a large international client;
- We are implementing a GIS project for a public client;
- We performed a large supply of server equipment for a public client;
- We have renewed the security infrastructure of a large international client;

Given the pandemic by the end of the year, we expect a sharp increase in sales of personal mobile devices (laptops and mobile workstations), an increase in sales of corporate security solutions given the change of work to the home-office regime of many of our customers, but this increase will not offset the expected decline in sales of network solutions for offices, servers and storage for data centers. Many of our clients are directly affected by the measures introduced in different countries, which will lead to a huge drop in their

revenues and revision of investment and development plans, which will affect the business in the remaining quarters.

Despite the pandemic and the difficulties it created, the goal of the business unit for system integration is to achieve the set goals for the year set prior to the pandemic and currently, given the anticipated projects, this goals seems achievable.

SIRMA AI AND ONTOTEXT USA

- **Sirma AI is a Daughter company of Sirma Group Holding JSC**
- **Share Capital: BGN 1 410 460.**
- Shares:
 - **Ordinary Shares**, Number: 127 144, Nominal: BGN 10, available, with voting rights, dividend and liquidation share.

- **Class A**, Number: 13 902, Nominal: BGN 10

Sirma Group Holding owns 100% of the capital of the company.

Conditions for the business development in Q3 2020

The main technology market on which Sirma AI's sales depend is that of graph databases (DBMS) and in general technologies based on graph data representation for integration and analysis.

The industrial sectors, which are the largest users of such DBMS, technologies and related services, remain the same: financial services, mechanical engineering (aviation and automotive) and automation, publishers of business information, pharmaceuticals and the public sector. During Q3 in most of these sectors the work processes restored the normal rhythm, which creates preconditions for strong sales in the fourth quarter - the sales cycle of the company's products is about 3 months.

The demand for both databases and complete solutions based on the so-called Knowledge graphs remain stable. According to the Hype Cycle of AI 2020 (Gartner ID 448060, July 2020), Knowledge Graphs are still in the rising tide of the technology wave.

The leading product of Ontotext GraphDB maintains and further develops its position as one of the global leaders based on graph databases.

Version 9.4 of GraphDB was released in September, which adds the ability to access data via the JDBC driver. This greatly expands the range of applications that can extract data from GraphDB. In the new version, special attention is paid to the integration with business intelligence environments (business intelligence, BI): Tableau and MS

Power BI. This version also facilitates the process of transforming structured data (eg tables) into a graphical representation by adding the ability to visually define the correspondence between input elements (eg columns) and the corresponding classes and types of relationships in the graph. Ultimately, it makes it much easier to both load data into GraphDB and access it from other applications. With this, GraphDB improves its positioning compared to its direct competitors - some of which already have similar functionalities, while others do not yet.

In September, a new analysis by Blur Research Forrester, "Graph Database Market Update 2020", was published, listing Ontotext as one of the "champions" of the market.

Regional and international factors, reflected on the business of the company

Sirma AI's main markets are the EU, the US and the UK. Over 90% of the company's revenues come from large multinational companies, which are weakly influenced by regional factors. During the period there were no significant effects of regional factors on business.

The COVID-19 crisis affected business, mainly in a delay in decision-making. The negative trend in revenues from professional services continues - among the reasons are both the long sales cycle for launching new projects for the delivery of complete solutions and the tendency of many customers to limit the cost of external services. Revenue continues to slow in some large embedded use (OEM) contracts in new versions of partner products. New versions of these partner products, scheduled for Q2, are expected to be released in Q4 due to difficulties in Q2 and Q3.

Operationally, most employees switched to remote operation without any problems. Employees who worked in the office during the period were tested with PCR tests twice a week.

Business development in Q3 2020 and realization of the investment plan

Revenues, following the consolidation of Ontotext USA, are 50% of the target for the year realized a decrease of about 15% compared to this period in the previous year. Despite the lag in revenues, a profit was realized - about 53% of the target for the year.

Part of the lag is due to a large project, where the bulk of the work was done in the first half of the year, but will be accepted by the client in the second half, which means that the revenue will be recognized then.

Revenues from licenses increased by 32%, and revenues from hosting doubled compared to Q3 2019.

In full compliance with the business plan in by the end of Q3 2020 about 65% of the planned funds for product development during the year were invested.

New clients, projects, products and services in Q3 2020

New:

- **Clients:** These include NASA, global pharmaceutical company, a large children's hospital and one of the largest short-term / holiday real estate rental platforms in the United States, a Chinese developer of specialized healthcare software, and the Royal Pharma Society in the United Kingdom.
- **Products:** Sirma AI has announced a new version of GraphDB (9.4).
- **Services:** No new services were introduced during this quarter.

Important events in Q3 2020

- The beginning of the COVID-19 crisis.
- The company participates as a gold sponsor in the Knowledge Graph Conference (one of the most important technology forums in the field). The conference was held virtually and gathered over 500 participants. The company also participates in the online edition of the Semantics 2020 EU conference with over 400 participants.
- Strategic partnership with Semantic Web Company (Austria) was announced in September

New contracts in Q3 2020

- New contract for sale of licenses to an existing client – a US top 5 bank;
- Contract for the development of a system for the analysis of medical scientific publications for a hospital in the United States.
- Signed contracts and start of work on a research project „PLANET“, aimed at optimizing logistics chains.

There is no change in the strategic goals set in the Business Plan for 2020:

Perspectives and forecast for 2020

Good market conditions are expected in 2020, ie. growing demand for graph databases and related technologies. On the other hand, after March, the COVID-19 crisis led to a serious delay in the implementation of projects by clients and partners. Given the unclear prospects for overcoming the crisis, the company's expected revenues for the year will be lower than the ones set in the business plan. Thanks to the cost control measures taken, the company's profit is expected to be realized in volumes close to the planned ones.

- Development of the network of partners and achieving revenues through partners of at least BGN 2 million. The partner network continues to develop very successfully during the period and has the potential within 2020 to generate product revenues to compensate for the lag in revenues from the delivery of solutions;
- Increasing revenues from licenses and maintenance up to 50% of total revenues;
- Increase in recurring revenues over 35% of total revenues.

EngView Systems Sofia JSC is a joint-stock company, member of Sirma Group, with main activity - development of software products .

ENGVIEW SYSTEMS IN Q3 2020

CONDITIONS FOR BUSINESS DEVELOPMENT Q3 2020

EngView Systems operates in two main markets - the software for video measuring machines and the packaging industry. The company works with manufacturers of packaging and displays around the world, served by a developed and expanding network of distributors and partners.

A large share of packaging production remains in the established offset printing segment. The spread of digital technologies is happening at an ever-increasing pace and more and more companies are investing in digital printing and production machines. New niche markets are being formed, related to personalization, small circulations of cardboard and corrugated packaging, products for advertising purposes and better visualization of selected brands (shelves) or entire structures, exhibition stands, shows, printed and cut from thick

materials. (rigid Board). In Europe and the United States, there is a trend for the entry and production of materials and products from them, which are directly related to nature conservation and are environmentally friendly and easily recycled.

This determines the direction of the predominant investments in the packaging industry - along with those in machines. Companies from different niches are looking for solutions to further save time and resources, modernize their production to improve their competitiveness, and follow modern technologies that improve the relationship with the customer and optimize the order channels. Such solutions are Internet and cloud-based solutions for communication with customers and shortening the Order-Delivery cycle (web-to-print, web-to-pack), which become possible precisely in combination with new digital technologies.

In the market of technologies for monitoring the quality of serial production, the technological dynamics are smaller, but there can also be tendencies towards more intensive integration between the classical measuring technologies and communication, mobile, information, internet / cloud based technologies, allowing accelerated transfer, storage and processing of information received from measuring machines

and as a result - increasing the efficiency and reliability of the quality monitoring systems.

EngView Systems successfully develops its products in its two main areas for the packaging and video measuring industries. In recent years, the company has invested in the development of new products based on its already implemented solutions and the accumulated knowledge and expertise in individual niches. They meet the latest trends, as well as customer requirements for high-quality software capable of accelerating production, increase of sales through optimization and maintenance of additional processes. The main products of the company, work on which is ongoing in the first quarter of 2020 are Packaging Suite, ScanFit & Measure, m-caliper, packGATE, TurnCheck, as well as new developments of the Diemaking portal, Shared Space, which are expected to be released in late 2020. The development of a new project for one of the main corporate clients of the Prinzhorn Austria CAD system has started, which through integration of certain modules and functionalities in their existing CPMS system will lead to an increase in the efficiency of production and service of their end customers. The release of this product was expected in the last quarter of 2020, but was actually completed ahead of schedule and started in September.

Unfortunately, in the third quarter of 2020, the company had to operate in a pandemic security measures around the world. To a large extent, employees, partners and customers had to refocus on working from home, setting restrictions or closing offices altogether. The company had to take into account the new challenges and use the time mainly for the development of its products and sought new opportunities for marketing and sales. Despite the summer months and measures around the world, sales of products and services did not decline compared to the previous quarter and the company managed to generate sufficient funds.

REGIONAL AND INTERNATIONAL FACTORS INFLUENCING THE BUSINESS OF THE COMPANY

The company develops all of its products in Bulgaria, but has a network of distributors around the world, as well as its own offices in the United States and Brazil. The factors influencing the business are mainly related to the saturation of the market with competing products or the degree of development of the given market. A major share of software sales for the packaging industry is still generated in Europe, with the first 3 months of 2020 showing growth compared to 2019 with over 40% of sales of licenses and products of the company. As one of the leading names in the packaging industry, EngView works with strategic partners from Germany Heidelberg, for which new versions of their products are developed every year for the printing industry and from the USA - QVI for their video measuring machines. EngView has been working with both companies for years, strengthening its position by providing quality and modern software for their customers. The company is investing in a new QVI solution - Turn Check, which led to first sales at the end of 2019. The software manages a new type of QVI machine for measuring rotating parts and components. New sales are expected at the end of 2020.

BUSINESS DEVELOPMENT AND INVESTMENTS IN Q3 2020

The first half of 2020 is related to the preparation and launch of new functionalities in all products, developed by the company. This are expected to happen at the end of 2020. Online functionalities are being developed for the CAD system, the development of programs for the US partner – QVI continues. A new scanner is being developed, which is intermediate in size and with more modern technology for transferring the scanned image to the software.

The distribution of m-caliper is also being prepared, looking for new partnerships, pilot clients and participation in various exhibitions. The necessary connections and visits of customers have already been established and the sales are expected to take place in the second half of the year. There are no new sales in the first quarter of 2020. The company's efforts until the end of the year will be focused mainly on the marketing of the finished product, which is a mobile application that is ready for self-download, installation, setup and commissioning by users. The company is aware that it will take time to realize sales of this product, but nevertheless the first step has been made and the first sales are expected soon.

Another major development activity concerning mCaliper as a complete product is to achieve compatibility with every measuring instrument - especially those equipped with a Bluetooth data transmission device. mCaliper has long supported the most popular and well-known Bluetooth measuring instruments such as Sylvac and TESA, as well as mass-entering Chinese brands. However, they still cover a small share of the market for hand-held measuring instruments with data transmission technologies. In the first quarter of 2020, the world leader in this industry - Mitutoyo, announced the launch of its own Bluetooth adapter, which opened wide prospects for mCaliper, because Mitutoyo is the company with the largest market share among high-end hand-held measuring instruments. This could radically change the pace of penetration of Bluetooth and mobile technologies among measurement tools, because it may displace the standard imposed by Mitutoyo for data transmission with wireless technologies.

mCaliper was able to develop in a short time a stand-alone connection and support for the Mitutoyo adapter. In terms of marketing and sales activities - during this period they focused mainly on finding suitable partners for local distribution and some marketing activities to establish and promote the mCaliper brand.

Potential partners and distributors are sought among local representatives of major instrument manufacturers, local measuring equipment distribution chains, consultants. In February 2020, contacts were established with a company from Australia (www.metoptix.com), which is a distributor of many types of measuring equipment, as well as a consultant. They are also TESA's representative for the Australia and the New Zealand region. It already publishes information about mCaliper on its website.

PERSPECTIVES AND FORECAST FOR 2020

Revenues are expected to decline on an annual basis compared to 2019 due to the complicated economic situation due to the coronavirus. There is a reduced investment interest in all niches and industries in which the company operates. However, EngView is working on the first sales of new products in which it has invested in recent years. It is expected to happen by the end of the year, albeit in smaller quantities.

The company is using pandemic time to focus on developing online functionalities to support its customers and their businesses. A platform for online webinars and demonstrations was also purchased to promote the EngView brand and products around the world. By the end of the year, local webinars are planned for Mexico, the United States, Brazil and some European countries. As September is one of the busiest months of the year, the company held an online webinar for EMEA countries on its CAD software.

SIRMA BUSINESS CONSULTING JSC

- <https://sirmabc.com/>
- **Sirma Business Consulting JSC is a subsidiary of Sirma Solutions**
- **Capital: BGN 2 539 768**

Shares: Special conditions for transfer: the shares are vinculated and non-transferable for a period of three years from the incorporation of the company.

Classes of shares:

CLASS A: Number: 1 958 268, Nominal: BGN 1 Rights: regular, voting, right to dividend and liquidation share

CLASS B: Number: 581 500, Nominal: BGN 1 - Privileged, Non-voting, Entitled to Guaranteed Dividend

Sirma Solutions JSC holds 1 077 048 pcs. Class A shares and 296 500 Class B shares or 54.08% of the company's capital and 55% of the voting shares.

Sirma Business Consulting JSC (SirmaBC) is a subsidiary of Sirma Solutions JSC, which is highly specialized in the provision of software products and services in the financial sector. The SirmaBC implements Universal Banking Solutions (UBS) individually or based on the FlexCube (Oracle platform). This is a complete banking solution which has received worldwide recognition as one of the most preferred systems in the banking and financial industries.

The range of services provided by the company covers mainly banking, retail and wholesale banking, regulatory compliance and risk management as well as the whole range of implementation and advisory services. SirmaBC is the third largest holding company and accounts for about 20% of revenue.

SirmaBC was established as a consolidated unit in 2007 and has since become one of the leading technology players in the financial sector. The company has been established not only in the local market, but has continued to seek to increase its presence on international markets, especially in Europe, North and South America, Asia and the Caribbean. SirmaBC has a team of highly specialized professionals with complementary expertise in the financial field. This helps to develop a wide range of products designed to respond to growing demand and evolving industry trends tailored to the banking and financial industry specification both locally and globally.

The company is practically free of debt, and presents itself solidly, with strong financial results.

CONDITIONS FOR BUSINESS DEVELOPMENT OF SIRMA BC IN Q3 2020

The financial services market and the trends in its development in the world and in Bulgaria continued to be strongly influenced by regulations and the drive for digitalization. The focus and the search for new solutions was dominated by the desire and opportunities that develop into innovative forms of payment and payment instruments, as well as fast and convenient methods for "onboarding" customers. In addition, all financial players worldwide were looking for "self-learning solutions" in order to:

- manage customer information and knowledge of their behavior,
- combat the resources generated by the informal sector of the economy, including the requirements for monitoring and preventing money laundering,
- ensure measures for the protection of personal data and their protection,
- make the planned changes and meet the increased requirements for reporting of the financial players

There is more and more talk of "tokenization" and offering services that can be trusted by the clients of the financial players. Extensive use of hybrid services, as well as customer expectations for the free provision of easily accessible products and forms of payment, continue to

determine the technological solutions. In addition, everyone clearly understands that a new generation of rationalization and optimization in the sector is coming, which will be based on "robots", machine learning, analysis of large data sets and automation of business processes.

SirmaBC continues to provide its own services and products, which are focused only on the financial sector. During the first half of the year, several pilot installations in the Open Banking division were completed, which were presented at the Fintech Financial Forum in Sofia. All the presented novelties and innovations in "UBX Suite" aroused great interest. A major project in the Bahamas to implement a new version of the main banking system FC 12.3 has been completed.

REGIONAL AND INTERNATIONAL FACTORS, INFLUENCING THE BUSINESS OF THE COMPANY

The biggest factor is the pandemic of COVID-19, which blocked opportunities for travel and easy communication with customers and completely stopped everyone's opportunities for public organized marketing events. Despite the partial and not so effective measures of the government in Bulgaria and the united management in Europe on the labor market and in relations between the companies, there is uncertainty, tension and preparation for meeting the stagnation in the global economy.

MAIN EVENTS IN Q3 2020

SirmaBC took an active part in the Annual Fintech Summit 2020 and the Noise of Money 2020. The company became a member of AMCHAM Bulgaria and is actively involved in the business and professional development of BFA (Bulgarian Fintech Association).

NEW CLIENTS, PROJECTS, PRODUCTS AND SERVICES IN Q3 2020

- Clients

From the beginning of 2020 the company acquired 1 new client who has applied for a banking license. All existing customers of the company show and declare that they are partially or severely affected by the pandemic and the various financial measures to overcome it. At the moment there is no loss of contracts and revenues, but there are clear signals about what will be a negative prerequisite in the implementation of the plans and the achievement of the planned business development plans by the end of 2020.

- Projects

The implementation of started projects continues, including the two parallel implementations of major banking systems and several projects for the implementation of payment and other satellite solutions, which cover: "RepXpress", "ceGate" and "UBX Suite", DIGI Bank.

- Products

The company is actively trying to advertise and distribute the first versions of:

- Open banking API hub, which implements the BISTRA standard for all services in the scope of PSD2;
- Up2Pay - a payment software terminal that resides with a mobile application provider or as a Plug-in for a web site;
- Up2Seal - a portfolio for generating one-time passwords and codes, which also serves as an advanced electronic signature and provides SCA, which is within the meaning of the Payments Regulation.

- Services

The company positions a package of consulting services for analysis and documentation regarding the selection of digital

solutions. The methodology used is based on Assist Knowledge Development and the British Business Analysis Association.

PERSPECTIVES AND FORECASTS FOR THE NEXT PERIODS OF 2020

Continued stagnation and drastic change in the entire business climate in the region and around the world is expected due to COVID-19. The company's management regularly monitors the development of the pandemic and tries to quickly adapt measures to deal with the consequences in work processes and the change in daily communication due to the global stagnation.

SIRMA GROUP INC./DBA PANATON

- <http://panatonsoftware.com/>
- Sirma USA is a subsidiary of Sirma Solutions

General Business Conditions in 2020

We operate exclusively in North America and our business Sirma Group Inc. (SGI) engaged clients in the semiconductor, cybersecurity, consumer services, B2B and financial services sectors. Because of the diversity of our

clients we are impacted more from general macroeconomic conditions rather than specific sentiment in any one vertical.

In Q3 we are observing a maturing and commoditization of the software outsourcing services business. Our clients and prospects are aligning in two clear groups. The cost-first group is driven exclusively by the cost per hour of the

services offered and is generally less well informed and competent in terms of IT technology. These clients are hard to win as we are competing with lowest-cost providers from India, China and the former soviet republics. The second group of clients are ones that have a specific and/or immediate technology need, or who understand the TCO of building and operating software systems. This is our sweet spot, as we offer highly sophisticated small teams with specific in-depth technology capabilities.

In 2020 we intend to market our services in a more focused manner with an emphasis of specific business processes and

types of clients.

Forecast for 2020

We expect to continue to grow the outsourcing business at a moderate rate in 2020 and we intend to invest modestly in the trial launch of a core employee performance management technology we have been developing as part of a specific client engagement.

We are also planning to launch a startup incubator specific program that we believe will enhance our marketing reach.

SIRMA ICS

- <http://sirmaics.com/>
- **Sirma ICS is a subsidiary of Sirma Solutions**
- **Capital:** BGN 300 000 divided into 300 000 number of registered nominal shares with a nominal value of 1 BGN per 1 share with voting right, dividend and liquidation share. Sirma Solutions owns 270 000 number of shares or 90% of the capital.

Sirma ICS in Q3 2020

Sirma ICS is part of Sirma Group, with the main goal to concentrate the technological and business knowledge of Sirma Group's in the insurance sphere.

Conditions for Business Development in Q3 2020

The company operates in the insurance sector with target clients insurance brokers and insurance companies. Both

segments marked a decline in revenue. The reason for this is the economic and health crisis in 2020, respectively the declining revenues from non-compulsory insurance, which in turn causes a reduction in the spending for software and services.

The company offers a product covering all of the processes in the structure of an insurance broker - Sirma Insurance Enterprise Platform. There is also a developed opportunity for clients to integrate through the Sirma Insurance Enterprise MTPL API and to integrate the policy issuing a policy payment in any system and application. Regarding the online presence of brokers, we offer Sirma Insurance Enterprise Web Calculator. With this product, end visitors to websites can calculate their price and place an order. The company also creates individual solutions and developments on assignment such as websites, web portals for end customers, administrative portals and mobile applications.

Regional and global factors influencing the business of the company

The company has business only in Bulgaria at the moment.

Business Development in Q3 2020 and Investment plan

In Q3 2020 Sirma ICS continued with the execution of its strategic objectives:

- Development of new portals and mobile applications, including portals for clients of insurance companies and insurance brokers.
- Increasing the product range of the software for insurance brokers and optimizing the product and its functionalities
- Attraction of new insurance broker-clients.
- The company continues to rely on a stable and sustainable model of selling products with a monthly license fee, instead of relying on large one-off transactions which are more difficult to predict.

We were successful in attracting a few new insurance broker clients, while introducing the new price policy of the company.

In 2019, the company continues to rely on a stable and sustainable model of product sales with a monthly license fee instead of relying on large single-sale deals which are more difficult to predict.

New:

- customers

The Company entered into new contracts with insurance brokers.

- projects

- Customization of the Sirma Insurance Enterprise Platform,
- New products in the portal of an insurance company

New Contracts

More contracts with clients of Sirma Insurance Enterprise Web Calculator have been concluded, API for the TPL insurance, new additions to the portals of insurance companies.

Information on Client Retention

We anticipate the growth of Sirma Insurance Enterprise Platform, customer acquisition for Sirma Insurance Enterprise Web Calculator. Inclusion of Casco insurance product from at least 2 insurance companies. Improvements to 2 mobile applications, creation of at least 1 new mobile application, creation of websites and customer portals.

Perspectives and forecasts for 2020

We anticipate a decrease in the monthly fees of Sirma Insurance Enterprise Platform, due to dismissed employees of brokers (respectively licenses for the platform), a decrease in clients due to bankruptcies, retention or a small decrease in clients for Sirma Insurance Enterprise Web Calculator. Inclusion of Casco insurance product from 1 more insurance company and 1 new mobile application.

Extraordinary Information

The aggravated epidemic situation suggests a contraction of the market and a decline in revenues, and further increase of regulatory requirements. Aggravation of the requirements to the main clients of the company - the insurance brokers, leading to merger and acquisition processes and respectively – a smaller market.

FINANCIAL RESULTS

S&G TECHNOLOGY SERVICES

- <http://www.sngservices.co.uk/>
- **S & G Technology Services operates in the Financial Segment**

S & G Technology Services is a joint venture of Sirma Solutions, which operates in the United Kingdom. The company provides technology services in the areas of software integration, data integration and mobile technologies for the financial service sector.

S & G Technology Services has accumulated tremendous expertise on the banking industry and the development of technology solutions for some of the world's largest banks. This enables the company to better understand the challenges faced by customers, identify the areas in which it can provide innovative solutions and integrate seamlessly into its specific solutions within a broader delivery program. S & G Technology Services specializes in providing IT consulting services, software products and services to the software ecosystem of one of the most popular banking systems - the Temenos T24.

SIRMA CI

- **Sirma CI** is a subsidiary of Sirma Group Holding
- **Capital:** BGN 133 000. **Sirma Group Holding** owns 80% of the capital.

Conditions for Business Development in Q3 2020

Despite the COVID 19 pandemic at the end of Q3, our expectations for business development are positive, because

many retailers and current customers invest in digitalization and automation of processes in order to remotely serve current customers and attract new ones. On the other hand, there is an increased demand for software solutions that automate processes in order to optimize costs.

According to Gartner the top 3 services for Digital Retail, which are at their peak of demand for them:

- Software solutions for user engagement
- Conversational commerce, ie. technological solutions that recognize speech, speech, language processing via AI. These are applied in chatbots
- Algorithmic sales, ie. AI-based software solutions

According to Gartner the top 3 services of Digital Retail, which will be in demand in the next 2-5 years:

- Unified Commerce Ecosystem
- Real-Time Pricing
- Smart Check-Out

Of the top 3 services that Gartner defines at their peak, we offer two. The other products and expertise that we have and are described in the Technology stack (item 5) are very up to date. Regarding the services that will be in demand in the next 2-3 years, we are already working on one of them.

We are building a new concept of the new business model and plan to update the current LOYAX website by the end of the year at the latest or to launch an advertising page to advertise our new activities on the international market.

We are working on a completely new solution for eCommerce (B2B and 2C), ie. the rewriting of our platform continues to develop according to a plan on a market basis. Fully focused on unified commerce trends, which will unite our implementation solutions for large retailers: e-shop, loyal mobile application program, chatbots, real-time behavior analysis system (RTS) and more.

We have planned to make a Webinar together with GTC (our client), on which we are currently integrating a loyalty program in Serbia with the option to add an online store. At the Webinar we will invite all companies from the group that are in several European countries and their clients - tenants. Technology stack and Microservices - Sirma Customer Intelligence expertise and products:

- Consultations for digital transformation and innovation
- Business analysis and planning
- Individual web and mobile design (responsive)
- Personalized e-commerce (back-end and front-end development)
- Integration of loyalty program (back-end and front-end development)

- ERP integration / optimization
- Implementation of logistics integrations / optimizations
- Integrations for online payments
- Billing integrations
- Mobile applications - native Android and iOS
- RTS - real-time user behavior analysis system
- Chatbots - based on Melinda

New contracts during Q3 2020:

- A new contract with a large cosmetic retailer for long-term development for digital transformation including online sales, loyalty program and others.
- A new contract with international client on digital transformation for a loyalty program and online sales of goods, as well for development and maintenance for next 3 years.
- With the height of the Covid 19 pandemic, our current customers became more active with orders for new features to their current solutions in order to sell more to end customers.

Business Development in Q3 2020 and Investment plan

Establishing partnerships with German companies to enter the DACH market. At this stage we have advanced negotiations with partners from Austria and Germany. The plan is in Q4 to launch joint initiatives to attract customers. At the same time, we are developing partnerships with Mexico in the direction of retail: loyalty and Unified Commerce.

Perspectives and forecasts for 2020

Positive business development is expected for the next quarters 4, because COVID 19 forced large companies to digitalize their processes, which increased the interest in online sales, ie. the search for B2B and B2C solutions to generate direct sales with integrations with ERPs, virtual POSs, logistics solutions and others.

- We expect revenue growth in the range of 35-50% compared to 2019.
- eCommerce sales services and loyalty modules will continue to grow.
- It is expected that the interest in additional sales channels (digital transformation) such as mobile applications, chatbots, real-time analysis, etc. will increase.

SIRMA MEDICAL SYSTEMS

- **Sirma Medical Systems** is a subsidiary of Sirma Group Holding
- **Capital:** BGN 100 000. **Sirma Group Holding** owns 66% of the capital.

Key trends in Q3 2020

The main trends in diabetes management systems are the automation of the data collection process and the use of artificial intelligence, wherever and whenever possible. Attempts to create a system that resembles the normal functioning of the organism (so-called artificial pancreas) are still unsuccessful and companies are competing in the development and supply of integrated systems connected to different devices. New types of CGM devices with new technologies are being developed, but the process is rather slow and there is nothing new to the market.

Product development in Q3 2020:**Diabetes: M**

For Diabetes: M during the first quarter there is no development in the product itself. The product was released as a donation to pediatric endocrinology, and training of the medical team to the ward was conducted. Due to the epidemiological situation, the number of doctors and patients from Nipro who use the system for remote monitoring of diabetics has also increased. Nipro expressed a desire to make a commercial for the product at their expense and coordinated it with our marketing. Talks continue with the Japanese company Asken to use Diabetes: M in addition to their diet software and they are to be translated into Japanese.

MPI-2

The Android version of the main therapy application as well as the session video recording application has been released.

Cardiac:M

The implementation of a specialized application for monitoring heart disease has started. It was frozen due to the epidemiological situation, which necessitated the development of a completely new Medrec: M system, which is based on the server part created for Caradiac: M.

Medrec:M

Due to the epidemiological situation and the cessation of almost all activities in the country, it was necessary to develop an application which can track people's symptoms, as well as monitoring of the epidemiological situation in the country using a survey. The first version of Medrec: M was released at the end of March. Gradually, the product developed as a complete medical record for end users. Numerous functionalities have been developed, such as the creation and management of drug plans, an alarm system and reminders for patients' medication, as well as the addition of children's accounts. Functionality for tracking the vaccinations on the immunization calendars of Bulgaria and a number of other European countries has been added. The addition of immunization calendars to more countries continues. The product has started the development of the functionality for recording an appointment with a doctor. The clinical portal, necessary for remote examinations via video

and chat, was designed and developed, and by the end of the quarter it was already in alpha version.

A small project at Innovation Zed has been completed and talks have been held with the parent company SHL for future development of medical software related to their injection devices. A demonstration of Medrec: M was also made and they showed interest in the possibility of using us as a software provider. More details are expected in January or February 2021.

Now the goal is to create a powerful telemedicine system that is fully completed by the end of the year.

2020 targets

The main goals for 2020 are certification of Sirma Medical Systems according to ISO 13485. Analysis and planning for the development of the MPI-2 system to work without the need for specialist assistance. The entry into new hospitals and clinics of Diabetes: M, and possibly Cardiac: M and Medicine: M, in the field of remote patient follow-up.

7 RESULTS BY SEGMENTS

THE GROUP DEFINED OPERATION IN SEVERAL SEGMENTS:

Segment INTELLIGENT EVOLUTION OF ENTERPRISES

Companies of Sirma Group operating in the segment are: EngView Systems, Sirma AI, Sirma Solutions, Sirma Medical Systems, Datium, Sirma CI and Sirma Group Inc.

FINANCIAL RESULTS OF THE SEGMENT

	30.9.2020 BGN'000	30.9.2019 BGN'000
Revenue from:		
- external customers	18 709	14 552
Segment revenues	18 709	14 552
Changes in finished goods and work in progress	486	1 101
Cost of materials	(518)	(222)
Hired services expenses	(2 162)	(4 042)
Employee benefits expense	(9 987)	(5 982)
Depreciation and amortisation of non-financial assets	(3 930)	(1 274)
Other expenses	(538)	(956)
Segment operating profit	2 060	3 177

In Q3 2020 the revenues of the segment increased by 28,57%, and operating profit decreased by 35,16% or BGN 1 117 thousand compared to Q3 2019.

Segment SOLUTIONS, PRODUCTS AND CONSULTING IN FINANCE

Companies of Sirma Group operating in the segment are: Sirma Business Consulting, Sirma ICS, Sirma AI, Sirma Solutions, S&G Technologies Inc. and Sirma Group Inc.

FINANCIAL RESULTS OF THE SEGMENT

	30.9.2020 BGN'000	30.9.2019 BGN'000
Revenue from:		
- external customers	8 081	10 117
Segment revenues	8 081	10 117
Changes in finished goods and work in progress	55	511
Cost of materials	(43)	(151)
Hired services expenses	(1 125)	(1 059)
Employee benefits expense	(3 373)	(7 333)
Depreciation and amortisation of non-financial assets	(286)	(812)
Other expenses	(125)	(705)
Segment operating profit	3 184	568

In Q3 2020 the operating profit of the segment increased by 460,59% or BGN 2 616 thousand compared to Q3 2019.

Segment SYSTEM INTEGRATION

COMPANIES OF SIRMA GROUP OPERATING IN THE SEGMENT ARE: SIRMA SOLUTIONS

FINANCIAL RESULTS OF THE SEGMENT

	30.9.2020 BGN'000	30.9.2019 BGN'000
Revenue from:		
- external customers	13 941	14 097
Segment revenues	13 941	14 097
Changes in finished goods and work in progress	-	-
Cost of materials	(84)	(749)
Hired services expenses	(1 078)	(677)

Depreciation and amortisation of non-financial assets	(50)	(255)
Other expenses	(12 108)	(9 932)
Segment operating profit	269	2 062

In Q3 2020 operating profit of the segment decreased by 86,95% or BGN 1 793 thousand compared to Q3 2019.

8 MAIN MARKETS

Consolidated earnings of Sirma Group Holding for the historical period under review are of different nature and geographic origin. Traditionally, revenues from services and goods have the highest share. At the same time, Europe, North America and the United Kingdom are at the forefront of geographic distribution of earnings. Revenues by region and countries are presented in the following table.

REVENUE BY REGIONS AND COUNTRIES:

Region	30.09.2020 BGN '000	30.09.2019 BGN '000	Change BGN '000	Change %
Australia	20	15	5	33,33%
Asia	602	257	345	134,24%
Africa	8	28	(20)	(71,43%)
Europe	20 486	19 747	739	3,74%
United Kingdom	7 968	9 812	(1 844)	(18,79%)
South America	10	60	(50)	(83,33%)
North America	11 637	8 857	2 780	31,39%
Total	40 731	38 776	1 955	5,04%

9 CONSOLIDATED FINANCIAL RESULTS

CONSOLIDATED REVENUES

Consolidated revenues in Q3 2020 includes:

	30.9.2020 BGN '000	30.9.2019 BGN '000	Change BGN '000	Change %
Revenue from contracts with customers	39 291	37 533	1 758	4,68%
Gain on sale of non-current assets	4	5	(1)	(20%)
Revenue from financing	1 371	891	480	53,87%
Other income	65	337	(272)	(80,71%)
Total	40 731	38 766	1 965	5,07%

Consolidated revenues in Q3 2020 decreased by 5,07 % or BGN 1 965 thousand compared to Q3 2019 .

Consolidated revenue by product line includes:

	30.9.2020 BGN '000	30.9.2019 BGN '000	Change BGN '000	Change %
Sale of IT equipment	13 692	11 723	1 969	16,80%
Software services	12 604	13 532	(928)	(6,86%)
Licenses	3 408	2 065	1 343	65,04%
Consulting services	3 150	4 146	(996)	(24,02%)
Subscriptions	2 490	2 255	235	10,42%
Cloud services	879	749	130	17,36%
System integration	507	1 550	(1 043)	(67,29%)
Others	2 561	1 513	1 048	69,27%
Total	39 291	37 533	1 758	4,68%

CONSOLIDATED EXPENSES

	30.9.2020	30.9.2019	Change
	BGN '000	BGN '000	(BGN '000,%)
Cost of materials	(645)	(1 122)	477
<i>Change in %</i>			<i>(42,51%)</i>
Hired services expenses	(4 521)	(5 964)	1 443
<i>Change in %</i>			<i>(24,20%)</i>
Employee benefits expense	(15 411)	(15 256)	(155)
<i>Change in %</i>			<i>1,02%</i>
Depreciation and amortisation of non-financial assets	(4 291)	(2 367)	(1 924)
<i>Change in %</i>			<i>81,28%</i>
Capitalized own expenses	1 880	1 736	144
<i>Change in %</i>			<i>8,29%</i>
Cost of goods sold and other current assets	(12 106)	(10 326)	(1 780)
<i>Change in %</i>			<i>17,24%</i>
Changes in finished goods and work in progress	541	1 612	(1 071)
<i>Change in %</i>			<i>(66,44%)</i>
Other expenses	(665)	(1 272)	607
<i>Change in %</i>			<i>(47,72%)</i>
Total expenses	(35 218)	(32 959)	(2 259)
<i>Change in %</i>			<i>6,85%</i>

In Q3 2020 consolidated operating expenses decreased by BGN 2 259 thousand or by 6,85 % compared to Q3 2019 .

CONSOLIDATED FINANCIAL INCOME / COSTS (NET)

	30.9.2020	30.9.2019	Change	Change
	BGN '000	BGN '000	BGN '000	%
Financial costs	(496)	(448)	(48)	10,71%
Financial income	119	184	(65)	(35,33%)
Financial income / costs (net)	(377)	(264)	(113)	42,80%

Consolidated financial costs increased by BGN 48 thousand or by 10,71% in Q3 2020, mainly due to the increase in expenses on foreign exchange operations. Consolidated financial income decreased by BGN 65 thousand or by 35,33%, mainly due to the decrease in income from foreign exchange operations.

CONSOLIDATED ASSETS

Consolidated assets posted a decrease of BGN 3 524 thousand or 2,43% in Q3 2020. Traditionally, most of them are occupied by intangible assets, which is dictated by the activity of the Group and its ownership over a significant amount of software modules.

NON-CURRENT ASSETS

	30.9.2020	31.12.2019	Change	Change
	BGN '000	BGN '000	BGN '000	%

Current liabilities decreased by BGN 6 819 thousand or 23,36 % in Q3 2020.

CASH FLOWS

The Group has no liquidity problems and operates with the available resources while maintaining a low level of indebtedness for the period under review. Traditionally, the largest pay-out in revenue streams is paid by customers, while the role of a negative item is paid by payments to suppliers and payments for staff and social security contributions.

SUMMARY OF CASH FLOW

	30.9.2020	30.9.2019	Change	Change

10 EMPLOYEES AND ECOLOGY

ECOLOGY

Sirma Group Holding maintains and observes its commitments in compliance with the national legislation in the field of environmental protection. The company applies measures for consolidated collection of waste, minimization, recovery and recycling of municipal waste. The Group stopped the use of plastic cups, and they were replaced with porcelain and glass.

EMPLOYEES

The Company believes that its employees play a key role in the development of its business and the overall corporate goals and therefore pays special attention to the development of a common human resources management

strategy and policies. Sirma Group Holding's policies in this regard are aimed at stimulating the responsibility and motivation of the staff to fulfill the assigned tasks and objectives.

The company and the companies in the group apply certain selection criteria and consider that they have an ambitious team of professionals capable of pursuing the strategic and operational objectives. Sirma Group Holding invests in various training programs for its employees and provides its employees with opportunities for professional development.

11 RISK FACTORS

Risk management objectives and policies

The Group is exposed to various risks in relation to financial instruments. The main types of risks are market risk, credit risk and liquidity risk.

The Group's risk management is carried out by the central administration, in close co-operation with the board of directors and focuses on actively securing the Group's short to medium-term cash flows by minimizing the exposure to financial markets.

The Group does not actively engage in the trading of financial assets for speculative purposes nor does it write options.

The most significant financial risks to which the Group is exposed are described below.

MARKET RISK ANALYSIS

The Group is exposed to market risk through its use of financial instruments and specifically to currency risk, interest rate risk and certain other price risks, which result from both its operating and investing activities.

Foreign currency risk

Most of the Group's transactions are carried out in Bulgarian leva (BGN). Exposures to currency exchange rates arise from the Group's overseas sales and purchases, which are primarily denominated in US-Dollars and British Pounds.

To mitigate the Group's exposure to foreign currency risk, non-BGN cash flows are monitored. Generally, Group's risk management procedures distinguish short-term foreign currency cash flows (due within 6 months) from longer-term cash flows. Where the amounts to be paid and received in a specific currency are expected to largely offset one another, no further hedging activity is undertaken.

Exposures to foreign exchange rates vary during the period depending on the volume of overseas transactions.

Interest rate risk

The Group's policy is to minimize interest rate cash flow risk exposures on long-term financing. Longer-term borrowings are therefore usually at fixed rates. At 31 December 2019, the Group is not exposed to changes in market interest rates through bank borrowings. All financial assets and liabilities of the Group are with fixed interest rates.

CREDIT RISK

Credit risk is the risk that a counterparty fails to discharge an obligation to the Group. The Group is exposed to this risk for various financial instruments, for example by granting loans and receivables to customers, etc. The Group's maximum exposure to credit risk is limited to the carrying amount of financial assets recognized at the reporting date, as summarized below:

	30.9.2020	31.12.2019
	BGN'000	BGN'000
Classes of financial assets – carrying amounts:		
Trade receivables	10 906	10 806
Related party receivables	133	-
Cash and cash equivalents	7 652	10 550
Carrying amount	18 691	21 356

The Group continuously monitors defaults of customers and other counterparties, identified either individually or by group, and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and/or reports on customers and other counterparties are obtained and used. The Group's policy is to deal only with creditworthy counterparties. The Group's management considers that all the above financial assets that are not impaired or past due for each of the reporting dates under review are of good credit quality.

None of the Group's financial assets are secured by collateral or other credit enhancements in regard to transactions.

In respect of trade and other receivables, the Group is not exposed to any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. Trade receivables consist of a large number of customers in various industries and geographical areas. Based on historical information about customer default rates management consider the credit quality of trade receivables that are not past due or impaired to be good.

The credit risk for cash and cash equivalents is considered negligible, since the counterparties are reputable banks with high quality external credit ratings.

LIQUIDITY RISK

Liquidity risk is the risk arising from the Group not being able to meet its obligations. The Group manages its liquidity needs by monitoring scheduled debt servicing payments for long-term financial liabilities as well as forecast cash inflows and outflows due in day-to-day business. Liquidity needs are monitored in various time bands, on a day-to-day and week-to-week basis, as well as on the basis of a rolling 30-day projection. Long-term liquidity needs for a 180-day and a 360-day lookout period are identified monthly. Net cash requirements are compared to available borrowing facilities in order to determine headroom or any shortfalls. This analysis shows that available borrowing facilities are expected to be sufficient over the lookout period.

The Group's objective is to maintain cash and marketable securities to meet its liquidity requirements for 30-day periods at a minimum. Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the ability to sell long-term financial assets.

As at 31 December 2019, the Group's non-derivative financial liabilities have contractual maturities (including interest payments where applicable) as summarized below:

30 September 2020	<u>Current</u>		<u>Non-current</u>	
	<u>Within 6 months</u>	<u>6 to 12 months</u>	<u>1 to 5 years</u>	<u>Later than 5 years</u>
	BGN'000	BGN'000	BGN'000	BGN'000
Borrowings	1 047	13 484	8 158	-
Finance lease obligations	149	149	1 323	-
Trade and other payables	2 173	-	-	-
Related party payables	114	-	-	-
Total	3 483	13 633	9 481	-

This compares to the maturity of the Group's non-derivative financial liabilities in the previous reporting period as follows:

31 December 2019	Current		Non-current	
	Within 6 months	6 to 12 months	1 to 5 years	Later than 5 years
	BGN'000	BGN'000	BGN'000	BGN'000
Borrowings	-	15 761	8 380	-
Finance lease obligations	340	340	2 610	739
Trade and other payables	6 592	-	-	-
Related party payables	-	-	19	-
Total	6 932	16 101	11 009	739

The above amounts reflect the contractual undiscounted cash flows, which may differ from the carrying values of the liabilities at the reporting date.

Financial assets used for managing liquidity risk

The Group considers expected cash flows from financial assets in assessing and managing liquidity risk, in particular its cash resources and trade receivables. The Group's existing cash resources and trade receivables do not significantly exceed the current cash outflow requirements. Cash flows from trade and other receivables are all contractually due within six months.

12 OTHER INFORMATION AS PER APPENDIX 11 OF ORDINANCE 2 OF THE FSC

12.1 INFORMATION ABOUT EVENTS AND INDICATORS WITH INCREASED NATURE OF THE COMPANY, HAVING A SIGNIFICANT EFFECT ON THEIR ACTIVITY AND THEIR INCOME AND EXPENDITURE; EVALUATION OF THEIR IMPACT ON RESULTS IN THE CURRENT PERIOD

There are no events and indicators with an unusual nature for the company that have a significant impact on its operations and its realized revenues and expenses.

12.2 INFORMATION ABOUT OUT OF THE BALANCE SHEET TRANSACTIONS - NATURE AND BUSINESS PURPOSE, FINANCIAL IMPACT OF THE TRANSACTION ON ACTIVITY IF THE RISKS AND BENEFITS OF THESE TRANSACTIONS ARE ESSENTIAL FOR THE COMPANY AND THE DISCLOSURE OF THIS INFORMATION IS ESSENTIAL FOR ASSESSING THE FINANCIAL POSITION OF THE COMPANY.

There are no deals out of the balance sheet of the Company.

12.3 INFORMATION ABOUT THE USE OF FUNDS FROM THE NEW ISSUE OF SECURITIES, CARRIED OUT DURING THE REPORTING PERIOD.

The company did not use funds from a new issue of securities in the reporting period.

12.4. ANALYSIS OF THE RELATIONSHIP BETWEEN THE FINANCIAL RESULTS ACHIEVED, REPORTED IN THE FINANCIAL STATEMENT FOR THE REPORTING PERIOD AND EARLIER PUBLISHED PROJECTIONS FOR THESE RESULTS.

The financial results of the company correspond to the forecasts made in the Development Strategy of Sirma Group Holding, which is published on the company's website.

12.5 ANALYSIS AND FINANCIAL EVALUATION OF THE FINANCIAL RESOURCES MANAGEMENT POLICY WITH THE POSITION OF OPPORTUNITIES FOR THE SERVICE OF THE OBLIGATIONS, THE EVENTUAL THREATS AND MEASURES WHICH THE COMPANY WAS PREVENTED OR PROVIDED TO TAKE FOR THE PURPOSE OF REMOVING THEM.

The management of financial resources is subject to the requirement of maximizing efficiency while respecting payment deadlines agreed with both suppliers and customers. This means a predominant use of own funds, resulting in lower financial costs and interest costs. On the other hand, there is a significant reserve of undrawn loans that can serve both current and investment costs, which maintain high liquidity of payments.

The entity's ability to service obligations is expressed in terms of liquidity ratios in the description of the liquidity risk in this report. As evidenced by the values of the liquidity indicators, Sirma Group Holding JSC has no problems in meeting its obligations, both in the medium and long term. The company has regular proceeds from sale, while also using bank overdrafts, which allows it to service its obligations by successfully managing its financial resources and to properly and timely service its obligations.

12.6 ASSESSMENT OF THE POSSIBILITIES FOR THE IMPLEMENTATION OF INVESTMENT INTENTIONS WITH THE SIGNIFICANCE OF THE AMOUNT OF EXPENDITURE AND THE EFFECTIVENESS OF THE POSSIBLE CHANGES IN THE STRUCTURE OF FINANCING THAT ACTIVITY.

The management estimates that it is possible to realize the investment intentions declared with the prospectus for initial public offering.

12.7 INFORMATION ABOUT OCCURRING CHANGES FOR THE REPORTING PERIOD IN THE MAIN PRINCIPLES FOR THE MANAGEMENT OF THE COMPANY AND ITS ECONOMIC GROUP.

There were no changes during the reporting period in the company's main management principles and its economic group.

12.8 INFORMATION ABOUT THE MAIN CHARACTERISTICS OF THE FINANCIAL REPORTING PROCESSING INTERNAL CONTROL SYSTEM AND RISK MANAGEMENT SYSTEM

Under Bulgarian law, the management should prepare an annual report on the operations and a financial statement for each quarter to give a true and fair view of the

Company's financial position as of the end of the year, financial performance and cash flows in accordance with the applicable accounting framework. Management's

responsibility also includes the implementation of an internal control system to prevent, detect and correct mistakes and false statements as a result of the accounting system's actions. In this respect, the management observes the following basic principles in its activities:

- adherence to a particular management and accounting policy disclosed in the financial statements;

- carrying out all operations in compliance with the laws and regulations; coverage of all events and operations in a timely manner, with the exact amount of the amounts in the appropriate accounting articles.

- accounts and the relevant reporting period so as to allow the financial statements to be prepared in accordance with the specific accounting framework;

- observance of the precautionary principle in the valuation of assets, liabilities, income and expenses;

- detection and termination of frauds and errors;

- completeness and regularity of accounting information;

- preparation of reliable financial information;

- adherence to international financial reporting standards and adherence to the going concern principle.

During the reporting period, there have been no changes in the basic principles of management of SIRMA GROUP HOLDING

12.9 INFORMATION ON CHANGES IN MANAGEMENT AND SUPERVISORY BODIES IN THE REPORTING PERIOD.

No changes during the current period.

12.10 INFORMATION ABOUT THE KNOWN TO THE COMPANY AGREEMENTS (INCLUDING ALSO AFTER THE CLOSING OF THE FISCAL YEAR) AS A RESULT OF WHICH CHANGES MAY OCCUR AT A FUTURE TIME IN THE OWNED PERCENT OF SHARES OR BONDS BY CURRENT SHAREHOLDERS OR BONDHOLDERS.

The company has no information of agreements which may alter the owned percent of shares by current shareholders. The company has not issued bonds.

12.11 DETAILS OF THE DIRECTOR FOR CONNECTIONS WITH THE INVESTOR, INCLUDING A TELEPHONE AND ADDRESS FOR CORRESPONDENCE.

14 EVENTS AFTER THE END OF THE REPORTING PERIOD

World pandemic and the declaration of a state of emergency in the Republic of Bulgaria.

In early 2020, due to the spread of a new coronavirus (Covid-19) worldwide, difficulties arose in the business and economic activities of a number of enterprises and entire economic sectors. On 11 March 2020, the World Health Organization also announced the presence of a coronavirus pandemic (Covid-19). On 13 March 2020, the Bulgarian government declared a state of emergency for a period of one month, which was subsequently extended numerous times and introduced a number of restrictive and protective measures for business and people. The forecasts for the expected development of the Information and Communication Technologies sector in 2020 and the coming years are a function of the development of the health crisis and the economic stagnation caused by it.

The management has taken measures to improve the efficiency of the work process, in compliance with the prescriptions of the health authorities, focusing on the goal of retaining staff, which would ensure a good market position in the restoration of normal economic activity. The annual budget has been revised and analyzed in detail in order to limit the effects of the coronavirus and maintain stable financial indicators, and cost optimization measures are envisaged.

As the situation and the measures taken by the state authorities are extremely dynamic, the management of the Company is not able to assess the exact quantitative parameters of the impact of the coronavirus pandemic on the future financial condition and results of its activities. Management has analyzed the potential effects of the crisis and assessed the risks associated with it. In the analysis of the financial risks related to the change of the business environment, different scenarios with different degree of probability for their manifestation have been developed and considered. The worst case scenario, assessed as unlikely by management, could lead to a potential reduction in business volume and revenues from sales of products and services. This, in turn, could lead to a change in the carrying amounts of the company's assets, which in the separate financial statements are determined by a number of judgments and assumptions made by management and reporting the most reliable information available at the date of estimates.
