## 5/ "SIRMA GROUP HOLDING" JSC IN Q4 2021

### Summary – the crisis, that never happened, but from which we are all recovering

Optimism is taking over the forecasts. The global GDP decrease, resulting from the COVID crisis, in 2020 was less than previously expected. The decrease in the ICT spending, in 2020, actually did not take place and the sector grew with 0.9% y/y. Optimism is also evident with projected global economic growth and ICT spending in 2021.

Both the slump in 2020 and rebound in 2021 for the global economy and for the ICT sector are not evenly distributed across geographies and segments and carry the risk of recurring COVID complications.

### Development of the economy in Bulgaria in 2021

The European Commission ([Summer Economic Forecast, July 2021](#)) recorded Bulgaria's GDP contraction in 2020 of 4.2% (1% less than expected) and forecast a subsequent recovery in 2021 of 4.6% and 4.1% in 2022 (again about 1% better than expected).

Fiscal policy is expected to contribute significantly to the economic activity through government spending, investment and increased net transfers to households. The gradual recovery, which began in the third quarter of 2020, is expected to continue in 2021 and 2022. The re-opening of the economy and partial recovery of tourism are also fueling the come-back. Pre-pandemic levels of GDP are expected to be reached in Q4 2021, just like in the Euro Area.

Uncertainty and risk to the forecast growth remain high, albeit balanced. The most important risk for economic activity is observed in a potential new wave of COVID-19 in Bulgaria and around the world, which may subdue foreign trade, individual and corporate consumption and investments. Counterweight to this risk is the EU Resilience and Recovery plan, which is expected to impact the economies of Europe in late 2021 and the following years. The recovery of the Bulgarian economy is highly conditional and depends on the recovery of European economies, which are also the leading markets for Bulgarian industry.

### Development of the global economy in 2021

As a result of the COVID crisis, global GDP dropped by 3.2% in 2020 (less than expected at the end of last year). The economy was quick to rebound in 2021, with IMF forecast suggesting a 6% of global GDP growth for the year and another 4.9% in 2022 ([World Economic Outlook Update, IMF, July 2021](#)). Both the economic contraction and growth, however, are not evenly distributed among regions and carry increased risks for the future. Growth in 2021 is mainly due to the fast recovery of a few large economies (USA 7%, China 8.1%) and mask the gap between developed economies and emerging market.

As a standard, the development of the ICT industry closely follows the curve of global economic development, as the upward or downward trends normally overshoot that of GDP. This connection was severely broken in 2020 ([IDC, February 2021](#)). The main reason is the use of ICT technologies to overcome the effects of pandemic constraints (which lead to a decline in GDP) and the increased use of cloud technologies. IDC expects this trend to continue in the future.

### The Industry of Sirma

The companies from Sirma Group specialize in the information technology (IT) industry. Industry data is usually combined with data for the 'communication segment', as this segment is entirely dependent on information technology. Respectively, the industry acquires the name "Information and Communication Technologies" or ICT for short. Of all the diversity of ICT segments, the companies in the group work mainly in the segments "IT services" (system integration, infrastructure as a service, software as a service, software support, consulting) and "Business software" (different software products aimed at different business verticals and custom software development).

The two major segments ("IT Services" and "Software") in which the Group operates were the fastest growing in the past (see [Gartner Forecasts Worldwide IT Spending to Grow 9% in 2021](#) below). Historically, both segments have followed the same development trends. In 2020, the COVID pandemic changed this synchronicity, with "IT services", which are strongly linked to economic development, experiencing just a minimal growth of 1.7%. At the same time, the "Software" segment managed to maintain much of its growth potential (growth in 2020 of 9.1%), with clients using its products to overcome the constraints associated with the pandemic.

Expectations in early 2021 for the year, are that the two segments will return to strong synchronized growth of 9.8% and 13.2% accordingly.

The growth forecast for these segments obscures the underlying diversity of the sub-segments and their true potential in 2020 and beyond. Sirma's Smart Enterprise Evolution business line is growing even in 2020 and is expected to sustain double-digit growth for the period 2020-2024 (see Gartner's forecast below). Sirma's mission is to facilitate the intelligent digital transformation of businesses. All subsidiaries in the group do just that. These IT technologies and services are the ones that are gaining momentum from the COVID crisis and will continue to drive the growth of the entire IT sector.

Geographically Sirma is focused on the leading global markets (USA, UK and Europe) which are also expected to

make the fastest return to normal pre-COVID spending on IT as early as 2021.

Sirma is a B2B IT provider. Sirma's client portfolio - Digital Business (AI of Sirma, Consulting and Integration, Chatbots, IT Security and Software Development), Financial Institutions (AI of Sirma, Consulting, Integration, IT Security, Chatbots and products of Sirma Business Consulting JSC), Insurance (Sirma's Insurance Broker Platform), communication (AI of Sirma, GraphDB), publishing (AI of Sirma, GraphDB), media (AI of Sirma, GraphDB) and healthcare (AI of Sirma and products of Sirma Medical Systems AD) show a moderate reduction in IT spending levels in 2020, resilience during the COVID crisis, and a significant increase in their ICT investment is expected in the coming years (see Gartner below, ICT vertical spending). Sirma is not exposed to the verticals most affected by the COVID crisis - Transport, Entertainment and Tourism.

### Forecast for the Global ICT Sector in 2021

The COVID crisis has had a major impact on the IT industry and its customers. The ICT market in 2020, like all other economic sectors, experienced strong volatility. The year saw a normal first quarter, a dramatic decline in the second quarter and a stronger than expected recovery in the second half of the year. According to Gartner ([Gartner, July 14, 2021](#)), the ICT spending in the world in 2020 actually grew by 0.9% (with prior expected decline of 2.1%) compared to 2019 and will reach \$ 3.9 trillion at current prices.

Gartner expects a recovery in all segments of ICT in 2021 and an overall annual growth of the sector of 8.6%. The driver behind the growth in 2021 will be the "Devices" segment, which took the hardest hit in 2020. It is expected for the segment to mark a growth of 13.9% y/y with built up consumption pressure released. The "Software" and "IT services" segments will also have a significant growth during the year of 13.2% and 9.8% accordingly.

Recovery across countries, vertical industries and IT sub-segments still varies significantly, prompting a "K-shape recovery" – uneven for many sub-segments and geographies. From an industry perspective, banking and securities and insurance spending will closely resemble pre-pandemic levels as early as 2021, while retail and transportation won't see the same recovery until closer to 2023. IDC ([IDC, Global ICT Spending 2020 - 2023](#)) also expects a recovery in 2021 and growth of the global ICT market of about 3% in constant currency. At the same time, IDC expects growth in the "New Technologies segment" to reach 15.5% for the year, increasing the sector as a whole to a growth of 5.37% y/y. IDC expects developments in the "Traditional" segments in the coming years to roughly duplicate GDP growth, with the main drivers being cloud technology, big data, social networks and mobile services. The cost savings brought about by the application of the "Traditional" technologies will be directed to innovations and respectively to the "New Technologies" segment. COVID-19 has strengthened the division between "Traditional" and "New" technologies, and this trend is expected to deepen in

the coming years, as the expected growth in "New" technologies is forecast to remain around 15% on an annual basis in the coming years. The V-shaped recovery is expected to affect all segments of ICT in 2021:

Regionally, Latin America is expected to recover in 2024, while China's IT spending has already surpassed 2019 levels. North America and Western Europe are expected to recover by the end of 2021.

### Detailed Forecast

#### Segment „IT Services“

According to IDC (IDC, February 2021) the segment "IT Services" remains strongly aligned with the dynamics of GDP. The reason for this is the strong dependence of the

segment on the economic situation (measured at the macro level with the GDP indicator) of its customers. The sharp decline in economic activity in 2020 spared to some extent only "Supporting IT services", which reported a more moderate decline. Most of the other IT services have been suspended or postponed.

The good news for the segment is that in a Gartner survey from the end of 2020 ([Gartner Forecasts Worldwide IT Spending to Grow 6.2% in 2021, January 25, 2021](#)) 2/3 of the respondents plan to restore the used IT services that were stopped or postponed due to the COVID crisis.

### Segment "Software"

The segment „Software“ is the main driver for the decoupling of ICT from GDP in 2020.

According to IDC ([23 February 2021](#)), one of the engines of development of the software segment is artificial intelligence. About 88% of AI is concentrated in the "Software" segment.

The market for artificial intelligence is expected to grow by CAGR 17.5% in the period 2020 - 2024, reaching 204 billion USD in 2024. Within the AI market, "AI Software Platforms" will be the leaders in growth, reaching a CAGR of 32.7% over the near five-year horizon.

### Risks

According to David Lovelock from Gartner, the development of the ICT market in 2020 and 2021 is experiencing the greatest volatility in its history.

"Financial services" and "Telecommunications" are in a more sustainable position. At the other end of the spectrum are "Transport" and "Personal Consumption" (tourism, hotels, restaurants). "Cloud services" and "Mobile phones" have been relatively immune to negative developments in recent years. At the same time, "IT services" and "Infrastructure", which are highly dependent on the overall economic development, are at a risk of negative development, respectively.

## PARTICIPATION IN MANAGEMENT AND IMPLEMENTATION OF CONTROL ON THE SUBSIDIAR COMPANIES

In Q4 2021, as in previous periods, Sirma Group Holding's senior management was actively involved in the management of its subsidiaries. The high expertise and accumulated experience of Sirma Group Holding's managers helped companies to formulate their development goals and strategies as well as their business and financial plans. As a

result, the company achieved outstanding successes over the past period. At the same time, taking part in the management of the Group's companies, they monitored the Group's overall objectives, strategies for its development and financial discipline.

## - MANAGEMENT OF RISKS

The management of the risks of "Sirma Group Holding" JSC is the responsibility of the Board of Directors. In his activities, he is assisted by the Investment and Risk Committee. The holding also supports its subsidiaries for risk management.

Risk management is, inherently, the ability to anticipate threats to the company's activities, individual projects and minimize their adverse effects. The process is iterative. It starts with identifying the possible risks, goes through risk analysis and planning their management, then begins a process of monitoring and a regular return to the analysis process.

In "Sirma Group Holding" JSC a sophisticated risk management system has been set up.

### **Risk management in the "Sirma Group Holding" JSC includes:**

- Risk identification - This is a lengthy process that detects potential threats. In order to identify the expected and predictable risks, different methods are used: questionnaires (interview questionnaires), interviews, brainstorming, document analysis, a list of expected and predictable risks (checklist analysis), based on a previous experience
- Qualitative and quantitative risk analysis - Once the potential risks have been identified, a qualitative and quantitative analysis of each of them is required. The likelihood of occurrence and impact through predefined scales is estimated, for example Probability: very small, small, medium, large or very large; Impact: catastrophic, critical, permissible, insignificant.

A risk table is prepared with the data. Risks are grouped into categories, their likelihood of occurrence and their impact, as well as case scenarios that are implemented in case the risk occurs. The resulting list is sorted by impact and probability. A threshold is set, the risks over which it will be managed.

## **IMPACT OF EXCLUSIVE FACTORS**

The information in this report is not affected by the presence of exceptional factors.

## **SUMMARY INFORMATION RELATING TO THE STATE OF WHICH THE COMPANY DEPENDS ON PATENTS OR LICENSES, INDUSTRIAL, COMMERCIAL OR FINANCIAL CONTRACTS OR FROM NEW PROCESSING PROCESSES**

"Sirma Group Holding" JSC is not dependent on patents or licenses, industrial, commercial or financial contracts, as well as new production processes.

The risk table is reviewed and reassessed on a regular basis, as there is a chance that risks may be dropped, new ones added or ratings changed.

- Planning actions to overcome the risk

The next step in risk management is planning. This is the process of documenting the measures that will be applied to managing each of the identified key risks. 3 management strategies are used:

- a) risk avoidance - a strategy that reduces the likelihood of risk occurring;
- b) minimizing the risk-taking effect - a strategy that reduces the consequences of the risk;
- c) Emergency action plans - a strategy where the organization accepts the risk and is ready to deal with it if it comes to fruition;

As a result of the risk planning, a Risk Mitigation Monitoring and Management Plan is established. It may be a separate document or a set of information cards for each individual risk to be stored and managed in a database.

- Risk monitoring and control - This is the latest activity in risk management. This process has several main tasks:
  - confirm the occurrence of a risk
  - ensure that activities to prevent or deal with risks are implemented
  - Identify what risk has caused the relevant problems
  - document information to be used in a subsequent risk analysis;

### DESCRIPTION OF ALL AGREEMENTS FOR THE PARTICIPATION OF THE EMPLOYEES IN THE CAPITAL OF THE COMPANY.

There are no arrangements for the participation of employees in the capital of the Company.

## 8/ RISK FACTORS

### Risk management objectives and policies

The Company is exposed to various risks in relation to financial instruments. The main types of risks are market risk, credit risk and liquidity risk.

The Company's risk management is coordinated at its headquarters, in close co-operation with the board of directors and focuses on actively securing the Company's short to medium-term cash flows by minimizing the exposure to financial markets.

The Company does not actively engage in the trading of financial assets for speculative purposes nor does it write options.

The most significant financial risks to which the Company is exposed are described below.

## 8.1 Market risk analysis

The Company is exposed to market risk through its use of financial instruments and specifically to currency risk, interest rate risk and certain other price risks, which result from both its operating and investing activities.

### 8.1.1.1 Foreign currency risk

Most of the Company's transactions are carried out in Bulgarian leva (BGN). Exposures to currency exchange rates arise from the Company's overseas sales and purchases, which are primarily denominated in US-Dollars.

To mitigate the Company's exposure to foreign currency risk, non-BGN cash flows are monitored. Generally, Company's risk management procedures distinguish short-term foreign currency cash flows (due within 6 months) from longer-term cash flows. Where the amounts to be paid and received in a specific currency are expected to largely offset one another, no further hedging activity is undertaken.

### 8.1.1.2 Interest rate risk

The Company's policy is to minimize interest rate cash flow risk exposures on long-term financing. Longer-term borrowings are therefore usually at fixed rates. As of 31 December 2021, the Company was not exposed to changes in market interest rates. The Company's investments in bonds all pay fixed interest rates.

## 8.2 Credit risk

Credit risk is the risk that a counterparty fails to discharge an obligation to the Company. The Company is exposed to this risk for various financial instruments, for example by granting loans and receivables to customers, placing deposits, etc. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognised at the reporting date.

The Company continuously monitors defaults of customers and other counterparties, identified either individually or by group, and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and/or reports on customers and other counterparties are obtained and used. The Company's policy is to deal only with creditworthy counterparties. The Company's management considers that all the above financial assets that are not impaired or past due for each of the reporting dates under review are of good credit quality.

The Company has not provided its financial assets as collateral for transactions other than collateral for received bank loans.

In respect of trade and other receivables, the Company is not exposed to any significant credit risk exposure to a single counterparty or any group of counterparties having similar characteristics. Trade receivables consist of a small number of customers in single industry and geographical area. Based on historical information about customer default rates management consider the credit quality of trade receivables that are not past due or impaired to be good.

The credit risk for cash and cash equivalents is considered negligible, since the counterparties are reputable banks with high quality external credit ratings.

The carrying amounts disclosed above are the Company's maximum possible credit risk exposure in relation to these instruments.

## 8.3 Liquidity risk

Liquidity risk is the risk arising from the Company not being able to meet its obligations. The Company manages its liquidity needs by monitoring scheduled debt servicing payments for long-term financial liabilities as well as forecast cash inflows and outflows due in day-to-day business. Liquidity needs are monitored in various time bands, on a day-to-day and week-to-week basis, as well as on the basis of a rolling 30-day projection. Long-term liquidity needs for a 180-day and a 360-day lookout period are identified monthly. Net cash requirements are compared to available borrowing facilities in order to determine headroom or any shortfalls. This analysis shows that available borrowing facilities are expected to be sufficient over the lookout period.

The Company's objective is to maintain cash to meet its liquidity requirements for 30-day periods. Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the ability to sell long-term financial assets.

### Financial assets used for managing liquidity risk

The Company considers expected cash flows from financial assets in assessing and managing liquidity risk, in particular its cash resources and trade receivables. The Company's existing cash resources and trade receivables do not significantly exceed the current cash outflow requirements. Cash flows from trade and other receivables are all contractually due within six months.

## 9/ INFORMATION ABOUT EVENTS AND INDICATORS WITH INCREASED NATURE OF THE COMPANY, HAVING A SIGNIFICANT EFFECT ON THEIR ACTIVITY AND THEIR INCOME AND EXPENDITURE; EVALUATION OF THEIR IMPACT ON RESULTS IN THE CURRENT PERIOD.

There are no events and indicators with an unusual nature for the company that have a significant impact on its operations and its realized revenues and expenses; assessing their impact on results during the current period.

## 10/ INFORMATION ABOUT OUT OF THE BALANCE SHEET TRANSACTIONS - NATURE AND BUSINESS PURPOSE, FINANCIAL IMPACT OF THE TRANSACTION ON ACTIVITY IF THE RISKS AND BENEFITS OF THESE TRANSACTIONS ARE ESSENTIAL FOR THE COMPANY AND THE DISCLOSURE OF THIS INFORMATION IS ESSENTIAL FOR ASSESSING THE FINANCIAL POSITION OF THE COMPANY.

There are no deals out of the balance sheet of the Company.

## 11/ ANALYSIS AND FINANCIAL EVALUATION OF THE FINANCIAL RESOURCES MANAGEMENT POLICY WITH THE POSITION OF OPPORTUNITIES FOR THE SERVICE OF THE OBLIGATIONS, THE EVENTUAL THREATS AND MEASURES WHICH THE COMPANY WAS PREVENTED OR PROVIDED TO TAKE FOR THE PURPOSE OF REMOVING THEM.

The management of financial resources is subject to the requirement of maximizing efficiency while respecting payment deadlines agreed with both suppliers and customers. This means a predominant use of own funds, resulting in lower financial costs and interest costs. On the other hand, there is a significant reserve of undrawn loans that can serve both current and investment costs, which maintain high liquidity of payments.

The entity's ability to service obligations is expressed in terms of liquidity ratios in the description of the liquidity risk in this report. As evidenced by the values of the liquidity indicators, Sirma Group Holding JSC has no problems in meeting its obligations, both in the medium and long term. The company has regular proceeds from sale, while also using bank overdrafts, which allows it to service its obligations by successfully managing its financial resources and to properly and timely service its obligations.
