- *Complicated international situation*

The full-scale military invasion of Russia in Ukraine, which began on 24 February 2022, caused a wide international response and affected the countries of Europe in various aspects. The expectation is that the military conflict will have a negative impact and affect all businesses to one degree or another.

The escalation of hostilities between Russia and Ukraine, the imposition of sanctions and restrictions by the European Union, USA, Canada, Britain and other countries on Russia, the Russian Central Bank, credit institutions, companies, individuals and the closure of Russian stock exchanges, cause significant shocks, ubiquitous on financial markets. The Group has no direct exposure to Ukraine or Russia. However, the

impact on the general economic situation may necessitate a revision of some assumptions and judgments. At the same time, inflationary pressures continue to increase, with military action and rising quotations on all commodities expected to increase further.

Systematic risks operate outside the Group, but have a key impact on its activities.

These risks are specific to the whole market and cannot be avoided by diversifying the risk, as they are related to the macroeconomic situation, the political situation, regional development and others.

The economic sanctions imposed on Russia by USA and the European Union in connection with the military conflict are likely to have a direct impact on the Group's activities, in relation with the indirect effects of the effect on business and consumer confidence and commodity markets.

“Sirma Group Holding” JSC informs all interested parties that the interim separate financial statements of the Group as at 30 September 2022 have not been verified by a registered auditor.
