1/STATEMENT BY THE BOARD OF DIRECTORS OF "SIRMA GROUP HOLDING" JSC

The present interim separate report of the management of "Sirma Group Holding" JSC covers the period, ending on 31 March 2023 and was prepared in accordance with the provisions of Article 39 of the Accountancy Law and Art. 100o, para. 2 and 5 of the Law on the Public Offering of Securities (POSA), including also the established events, occurring after the balance sheet date. The structure of this report is in accordance Article 12 of Ordinance No. 2 of FSC.

The board of directors of the holding confirms that:

- there were no irregularities in which managers or employees were involved, which may be material to the consolidated financial statements:
- all material transactions are duly accounted for and reflected in the interim financial statements as at 31 March 2023.
- there is no actual or potential breach of laws and (or) other regulatory provisions that would have a material impact on the individual financial statements or could serve as a basis for reporting contingent loss;
- there are no legal or other restrictions on the flow of funds;
- there are no known trends, requests, commitments, events or occasional circumstances for which there is reason to expect that they may affect the company as a whole.

This management report contains estimates and information based on our beliefs and assumptions, using currently available information about them. Any statements contained in this report that are not historical facts are predictions. We have based these statements on the future of our current expectations, assumptions and predictions about future conditions and events. As a result, our predictions and information are exposed to uncertainties and risks, many of which are beyond our control. If one or more of these uncertainties or risks materialize or if the underlying management assumptions prove to be incorrect, our actual results may differ materially from those described in the report. We describe these risks and uncertainties in the Risk Section of the report.

The words "purpose", "predict", "accept", "believe", "in the future", "we could", "rely", "we are confident", "appreciate", "expect"," we "intend," we can "," can "," prospect "," plan "," project "," predict, "would" and other similar expressions are intended to identify these forward-looking statements. Such estimates are, for example, those made in the Business Results section of our quantitative and qualitative disclosures about market risk in accordance with International Financial Reporting Standards (IFRS), namely IFRS 7 and related statements in our Notes to the financial statements, our prospects for development, and other forecast information that appears in other parts of

this report. Unless required by law, we do not commit and we have no obligation to update or revise predictive statements as a result of new information we have received about the conditions that existed at the time of this report, future events, or otherwise unless we are obliged to do so under the law.

This report includes IT industry statistics and global economic trends that come from information published by sources including International Data Corporation (IDC), a market information and information technology consultant, telecoms and consumer technology markets; Gartner, the European Central Bank (ECB); and the International Monetary Fund (IMF). This data type is only the forecasts of IDC, the ECB, the IMF and other data sources for the global economy and industry. SIRMA does not guarantee any statistical information provided by sources such as IDC, Gartner, ECB, IMF, or other similar sources cited in this report. In addition, although we believe that information from these sources is generally reliable, this type of data is inaccurate. We warn readers not to create unnecessary dependence on this data.

In our Individual Management Report, we analyze our business activities for the reporting financial period as well as the current situation of "Sirma Group Holding" JSC. Starting from a description of our business, economic environment and strategy, we present our financial system and explain in detail our results and operations as well as our financial position and net assets. We also report on the various aspects of financial sustainability of "Sirma Group Holding" JSC and the expected development of possible risks.

The financial information presented in the "Sirma Group Holding" JSC JSC report includes our separate financial statements, our report to the Board of Directors and some financial aspects derived from our management accountability. The non-financial data presented in the report includes aspects of intellectual, human and social rights and relationships derived from our materiality assessment.

Our annual separate financial statements have been prepared in accordance with IFRSs. Internal control over financial reporting ensures the reliability of the information presented in the separate financial statements. Our Board of Directors has confirmed the effectiveness of our internal financial reporting.

The reporting period is the financial period ending on 31 March 2023. The report includes the activity of "Sirma Group Holding" JSC.

5/ "SIRMA GROUP HOLDING" JSC IN Q1 2023

Summary

Fragile recovery, slightly more balanced risks, but persisting inflation in conditions of contracted growth - this is how the IMF and OECD synthesize the global economy at the beginning of 2023. Although forecasts for economic development at the beginning of 2023 are slightly more optimistic than those at the end of 2022, risks to the global economy remain significant. Against this background, the ICT industry continues to be seen as the solution to overcome the consequences of the crisis. At the same time, the various segments of the ICT sector, and their subsegments, are expected to develop in diametrically different directions. While some segments are growing at double-digit rates (Software), others are experiencing a similar contraction (Devices). A similar divergent development can also be seen among the components of each segment (e.g. cloud software compared to stationary software).

The economy of Bulgaria in 2023 and forecast for the future years

Unfortunately, the processes caused by the war in Ukraine, disrupted supply chains, generated energy uncertainty and double-digit inflation led (as in all other countries) to limited growth. The BNB (BNB, Macroeconomic Forecast December 2022) expects the slowdown in economic growth to continue in 2023 and to reach only 0.4% growth during the year.

The negative influences on the European economy are transferred entirely to the Bulgarian one. In addition, however, increased domestic demand, and relatively weak fiscal measures led to the strengthening of negative processes in the country. Recovery of economic growth to 3.4% is expected only in 2024 when the recovery of the European markets for Bulgarian goods and services is also expected.

Overall for the period January 2022 through January 2023 the registered average inflation in Bulgaria has been determined by the National Statistical Institute is 16.7%. It is expected to decrease to 4.2% at the end of 2023 and 3.3% at the end of 2024. BNB expects on the average 2023 inflation to sit at 7%.

The risks to the development of the Bulgarian economy in 2023, according to the BNB, are

- · Escalation of the military conflict in Ukraine;
- Postponing the implementation of investment projects;
- A faster-than-expected rise in interest rates in the US and the EU;
- A slow rate of utilization of funds under European programs;
- Delayed implementation of the National Recovery Plan;

 Higher-than-expected inflation, as a result of prolonged retention of high prices of energy sources.

Development of global economy in 2023 and forecast for 2023

In March 2023, the OECD (OECD Economic Outlook, March 2023) reported global GDP growth of 3.2% in 2022 (more than 1% weaker than expected at the end of 2021). The factors that slow down world development are the war in Ukraine, inflationary growth, as well as China's economic slowdown. In early 2023, the OECD reports some positive signs, such as lower fuel prices, improving consumer sentiment, China's full opening-up and falling inflation. Expected global growth is 2.6% and 2.9% for 2023 and 2024, respectively (still about 0.5% less than expected at the end of 2022).

The IMF (World Economic Outlook, January 30, 2023) forecasts that the highest inflation values have already passed (around the third quarter of 2022) and inflation is expected to decrease in the future. Global inflation is expected to fall from 8.8% in 2022, to 6.6% in 2023 and 4.3% in 2024 (remaining still above the pre-pandemic levels of 3.5%).

The recovery to inflation levels (Gartner, April 6, 2023) that are close to historical average ones for different countries is expected to occur unevenly, and the timing of this in the large European economies (France and Germany) is expected to be only after 2025.

Although the IMF's forecasts in January 2023 are more optimistic than those in October 2022, risks to the world's economic development still remain. These are: an escalation of Russia's war in Ukraine, an increase in debt distress due to high interest rates and slowing growth, a potential persistence of inflation and a worsening health situation in China and a slowdown in China's economic recovery, a deepening of the geopolitical fragmentation that has begun in 2022. Since March 2023, after the bankruptcy of several banks, a "global banking and financial crisis" was added to the potential risks that threaten global economic development.

Growth in the **advanced economies** is expected to fall from 5.2% in 2021 to 1.2% in 2023. The Central banks in advanced economies have sharply increased key interest rates. This measure, designed to fight inflation, is also contributing to the slowdown in the economy.

GDP growth in the **emerging economies** is also slowing, from 6.6% in 2021 to 3.9% in 2022 and 4.0% in 2023, which is significantly below the average level of 4.8% over the period 2011-2019. The negative impact of the war in Ukraine

will erode the increased revenues of some fuel-exporting countries.

The development of the world economy is moving in the exact opposite direction of inflation. GDP growth has contracted sharply since the start of 2022 and is expected to remain at relatively low levels (lower than the average for the last 10 years), in contrast to inflation, which set records for its growth in 2022.

Despite depressed economic growth in 2022, no (standard in such cases) recovery is expected in 2023. This is due to the various factors that hinder economic development and which are expected to persist in 2023 – high prices of consumer goods, food and fuels, as well as increased monetary restrictions and rising interest rates (aimed at fighting inflation). Moreover, limited development is accompanied by more than normal risks (for which the IMF has a higher than average expectation of realization).

The Industry of Sirma

Sirma Group companies specialize in the information technology (IT) industry, predominantly focused on businesses (B2B). Industrial data is usually combined with data on the "communications segment" because this segment is completely dependent on information technology. Accordingly, the industry acquired the name "Information and Communication Technologies" or ICT for short. Out of all the variety of ICT segments, the companies in the group mainly work in the segments "IT services" (system integration, infrastructure as a service, software as a service, software support, consulting) and "Business software" (various software products and services aimed at different business verticals and custom software development).

The two main segments ("IT Services" and "Software") in which the Group operates were the fastest and most consistently growing in the past (Gartner, April 6, 2023). Historically, both segments have followed the same development trends. The two segments are seen as the solution to all problems arising from global economic uncertainty. The mass digitization that is unfolding relies precisely on "Software", for the various technological solutions and "IT services" through which these solutions can be implemented. This led to growth in both segments in 2022, as well as expectations for continued growth in 2023 and beyond.

Expectations for 2023 are that both segments will not only maintain their growth - 12.3% for "Software" and 9.1% for "IT Services", but that growth will be accelerating to 13.1% and 10.2% in 2024 respectively.

Geographically, Sirma is focused on the world's leading markets (US, UK, and Europe), which are also the leading geographic centers for demand for ICT products and services.

Sirma is a B2B IT provider. Sirma's client portfolio - Digital Business (Consulting and Integration, Chatbots, IT Security and Software Development), Financial Institutions (Consulting, Integration, IT Security, Chatbots, and the

products of Sirma Business Consulting AD), Insurance (The platform for insurance broker of Sirma), hospitality (Sciant), and healthcare (Sirma Medical Systems) show sustainable development and strong growth in 2023 and the following years.

The global ICT market in 2022 and future forecast

After the rapid recovery from the COVID-19 recession in 2021 and the achieved sector growth of 10%, IT spending stagnated in 2022 (Gartner, April 6, 2023) - with limited growth of only 0.5% for the year. Another feature of the ICT market in 2022 was its multidirectional development - while the "Data Center" segment recorded double-digit growth of 13.7%, the "Devices" segment shrank by approximately the same percentage (10.7%). In 2023, the ICT sector is expected to restore its "normality", as well as to resume its upward trend - growth of 5.5% for the year.

Table 1. Worldwide IT Spending Forecast (Millions of U.S. Dollars)

	2022 Spending	2022 Growth (%)	Spending	2023 Growth (%)	2024 Spending	2024 Growth (%)
Data Center Systems	216,095	13.7	224,123	3.7	237,790	6.1
Devices	717,048	-10.7	684,342	-4.6	759,331	11.0
Software	793,839	8.8	891,386	12.3	1,007,769	13.1
IT Services	1,250,224	3.5	1,364,106	9.1	1,502,759	10.2
Communications Services	1,424,603	-1.8	1,479,671	3.9	1,536,156	3.8
Overall IT	4,401,809	0.5	4,643,628	5.5	5,043,805	8.6

Source: Gartner (April 2023)

The ICT markets of consumers and corporate customers are experiencing different dynamics during the two years under review. While inflation erodes the purchasing power of individual consumers, businesses continue to invest in their digitization. It is because of some of the challenges in the world that the leading segment in 2022 is shaping up to be "Data Centers" with a growth of 12% year-on-year in current USD prices. The Software and IT Services segments remain in second and third place, expected to grow by 7.1% and 3%, respectively, in 2022. The big loser for the year turned out to be the Devices segment with a drop of as much as 10.6%. The negative impact of inflation on the purchasing power of "Devices" consumers around the world has led to the postponement of much of their purchases and technological renewal, resulting in a dramatic decline in the segment.

In 2023, the ICT sector is expected to restore its "normality", as well as to resume its upward trend - growth of 5.5% in 2023 in current prices. Although "Data Centers" continue to grow, their growth is significantly lower - 3.7%. On the other hand, "IT services" and "Software" again occupy their leading place with growth of 9.1% and 12.3% respectively in 2023. For the first time in many years, the Communication Technologies segment is expected to post significant growth of 3.9%. The entire ICT sector is expected to reach a record USD 4.6 trillion during the year – with growth only expected to accelerate in the coming years (8.6% in 2024).

Sources of growth

The growth expected in 2023 and the following years is global. While leading by volume, spending growth is also leading in North America, Europe and Australia.

Even countries experiencing increased economic difficulties (Turkey, Greece, Argentina) are expected to increase their ICT spending in the coming years. Forecast growth varies significantly between countries, but no country is expected to shrink its ICT spending.

Despite the ubiquitous growth, it is uneven among the different technology segments. The expected growth of ICT spending in constant currency in 2023 is 5.2% and CAGR 2022-2027 of 6.3%. At the same time, these are only the average values, as there is almost no segment that has a similar growth. "Devices" has limited and sometimes negative growth. "Software" as a whole lead the segments in terms of growth. Infrastructure as a Service (laaS) outperforms all segments with a whopping growth of 30.2% in 2023 and a CAGR of 24.2% Software (Infrastructure Software, Application Software and Vertical Specific Software) and IT Services (Consulting, System Integration) are the segments expected to lead the growth in 2023 and the coming years, with double-digit annual growth starting from 2023.

If individuals' ICT spending is excluded from these forecasts, the sector's growth is even more impressive. Business spending on ICT grew by 8.2% in 2022 and is expected to grow by 7.5% in 2023. This lends to the claim that business spending on ICT is recession-proof. The "Software" and "IT services" segments are leading again, with their growth accelerating in the coming years.

When looking at the components of growth in the leading segment "Software", yet again huge differences can be observed in the anticipated growth between the various subsegments – ranging from -7% to +27%.

It is also interesting to note the massive dominance of cloud software relative to non-cloud solutions. Although the latter have their place in the future as well, cloud-based software is experiencing a much greater growth, which reveals the full direction of the market towards cloud-based solutions. Almost all leading sub-segments are already predominantly in the cloud, and this share is only expected to increase in the coming years.

The components of the second most dynamic segment - "IT services" also have very different growth patterns. "Infrastructure as a service" is also growing with rates which are literally off the charts. Similar is the growth of all other services related to cloud access. "Design" and "Construction" in all its varieties is also expected to see significant growth in 2023 and the following years.

PARTICIPATION IN MANAGEMENT AND IMPLEMENTATION OF CONTROL ON THE SUBSIDIAR COMPANIES

In Q1 2023, as in previous periods, Sirma Group Holding's senior management was actively involved in the management of its subsidiaries. The high expertise and accumulated experience of Sirma Group Holding's managers helped companies to formulate their development goals and strategies as well as their business and financial plans. As a

result, the company achieved outstanding successes over the past period. At the same time, taking part in the management of the Group's companies, they monitored the Group's overall objectives, strategies for its development and financial discipline.

7/ PERSONNEL AND ECOLOGY

7.1 ECOLOGY

Sirma Group Holding maintains and observes its commitments in compliance with the national legislation in the field of environmental protection. The company applies measures for separate collection of waste, minimization, recovery and recycling of municipal waste. In 2017, the use of plastic cups stopped, and they were replaced with porcelain and glass cups.

7.2 PERSONNEL

The Company believes that its employees play a key role in the development of its business and the overall corporate goals and therefore pays special attention to the development of a common human resources management

strategy and policies. Sirma Group Holding's policies in this regard are aimed at stimulating the responsibility and motivation of the staff to fulfill the assigned tasks and objectives.

The company and the companies in the group apply certain selection criteria and consider that they have an ambitious team of professionals capable of pursuing the strategic and operational objectives. Sirma Group Holding invests in various training programs for its employees and provides its employees with opportunities for professional development.

The structure of the personnel of Sirma Group Holding has the following dynamics:

"Sirma Group Holding" JSC	31.3.2023 Number of employees	31.3.2022 Number of employees
Employment contract	20	20
Contract for management and control	9	6
Total	29	26

DESCRIPTION OF ALL AGREEMENTS FOR THE PARTICIPATION OF THE EMPLOYEES IN THE CAPITAL OF THE COMPANY.

There are no arrangements for the participation of employees in the capital of the Company.

8/ RISK FACTORS

Risk management objectives and policies

The Company is exposed to various risks in relation to financial instruments. The main types of risks are market risk, credit risk and liquidity risk.

The Company's risk management is coordinated at its headquarters, in close co-operation with the board of directors and focuses on actively securing the Company's short to medium-term cash flows by minimizing the exposure to financial markets.

The Company does not actively engage in the trading of financial assets for speculative purposes nor does it write options.

The most significant financial risks to which the Company is exposed are described below.

8.1 Market risk analysis

The Company is exposed to market risk through its use of financial instruments and specifically to currency risk, interest rate risk and certain other price risks, which result from both its operating and investing activities.

As the economic consequences of the war unfolded in Ukraine, strong inflationary pressures arose. Inflation is expected to remain high in the short term. In the medium term, as the energy market rebalances, uncertainty is expected to ease and inflation to fall towards the end of 2023. By the second half of 2025, easing pressures from energy prices and other costs, together with the ECB's monetary policy measures, should return inflation to the target level.

The expected retention of the level of inflation will continue to affect the maintenance of high levels of purchase prices of the goods and services used by the Company, which could lead to an unexpected contraction of consumer demand and, accordingly, future revenues.

8.1.1.1 Foreign currency risk

Most of the Company's transactions are carried out in Bulgarian leva (BGN). Exposures to currency exchange rates arise from the Company's overseas sales and purchases, which are primarily denominated in US-Dollars.

To mitigate the Company's exposure to foreign currency risk, non-BGN cash flows are monitored. Generally, Company's risk management procedures distinguish short-term foreign currency cash flows (due within 6 months) from longer-term cash flows. Where the amounts to be paid and received in a specific currency are expected to largely offset one another, no further hedging activity is undertaken.

8.1.1.2 Interest rate risk

The Company's policy is to minimize interest rate cash flow risk exposures on long-term financing. Longer-term borrowings are therefore usually at fixed rates.

At 31 March 2023, the Company is exposed to the risk of changes in market interest rates on its bank loans, which have a variable interest rate. All other financial assets and liabilities of the Company have fixed interest rates.

8.2 Credit risk

Credit risk is the risk that a counterparty fails to discharge an obligation to the Company. The Company is exposed to this risk for various financial instruments, for example by granting loans and receivables to customers, placing deposits, etc. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognised at the reporting date.

The Company continuously monitors defaults of customers and other counterparties, identified either individually or by group, and incorporates this information into its credit risk controls. Where available at reasonable cost, external credit ratings and/or reports on customers and other counterparties are obtained and used. The Company's policy is to deal only with creditworthy counterparties. The Company's management considers that all the above financial assets that are not impaired or past due for each of the reporting dates under review are of good credit quality.

The Company has not provided its financial assets as collateral for transactions other than collateral for received bank loans.

In respect of trade and other receivables, the Company is not exposed to any significant credit risk exposure to a single counterparty or any group of counterparties having similar characteristics. Trade receivables consist of a small number of customers in single industry and geographical area. Based on historical information about customer default rates management consider the credit quality of trade receivables that are not past due or impaired to be good.

The credit risk for cash and cash equivalents is considered negligible, since the counterparties are reputable banks with high quality external credit ratings.

The carrying amounts disclosed above are the Company's maximum possible credit risk exposure in relation to these instruments.

8.3 Liquidity risk

Liquidity risk is the risk arising from the Company not being able to meet its obligations. The Company manages its liquidity needs by monitoring scheduled debt servicing payments for long-term financial liabilities as well as forecast cash inflows and outflows due in day-to-day business. Liquidity needs are monitored in various time bands, on a day-to-day and week-to-week basis, as well as on the basis of a rolling 30-day projection. Long-term liquidity needs for a 180-day and a 360-day lookout period are identified monthly. Net cash requirements are compared to available borrowing facilities in order to determine headroom or any shortfalls. This analysis shows that available borrowing facilities are expected to be sufficient over the lookout period.

The Company's objective is to maintain cash to meet its liquidity requirements for 30-day periods. Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the ability to sell long-term financial assets

Financial assets used for managing liquidity risk

The Company considers expected cash flows from financial assets in assessing and managing liquidity risk, in particular its cash resources and trade receivables. The Company's existing cash resources and trade receivables do not significantly exceed the current cash outflow requirements. Cash flows from trade and other receivables are all contractually due within six months.

9/ INFORMATION ABOUT EVENTS AND INDICATORS WITH INCREASED NATURE OF THE COMPANY, HAVING A SIGNIFICANT EFFECT ON THEIR ACTIVITY AND THEIR INCOME AND EXPENDITURE; EVALUATION OF THEIR IMPACT ON RESULTS IN THE CURRENT PERIOD.

There are no events and indicators with an unusual nature for the company that have a significant impact on its operations and its realized revenues and expenses; assessing their impact on results during the current period.

10/ INFORMATION ABOUT OUT OF THE BALANCE SHEET TRANSACTIONS - NATURE AND BUSINESS PURPOSE, FINANCIAL IMPACT OF THE TRANSACTION ON ACTIVITY IF THE RISKS AND BENEFITS OF THESE TRANSACTIONS ARE ESSENTIAL FOR THE COMPANY AND THE DISCLOSURE OF THIS INFORMATION IS ESSENTIAL FOR ASSESSING THE FINANCIAL POSITION OF THE COMPANY.

There are no deals out of the balance sheet of the Company.

11/ ANALYSIS AND FINANCIAL EVALUATION OF THE FINANCIAL RESOURCES MANAGEMENT POLICY WITH THE POSITION OF OPPORTUNITIES FOR THE SERVICE OF THE OBLIGATIONS, THE EVENTUAL THREATS AND MEASURES WHICH THE COMPANY WAS PREVENTED OR PROVIDED TO TAKE FOR THE PURPOSE OF REMOVING THEM.

The management of financial resources is subject to the requirement of maximizing efficiency while respecting payment deadlines agreed with both suppliers and customers. This means a predominant use of own funds, resulting in lower financial costs and interest costs. On the other hand, there is a significant reserve of undrawn loans that can serve both current and investment costs, which maintain high liquidity of payments.

The entity's ability to service obligations is expressed in terms of liquidity ratios in the description of the liquidity risk in this report. As evidenced by the values of the liquidity indicators, Sirma Group Holding JSC has no problems in meeting its obligations, both in the medium and long term. The company has regular proceeds from sale, while also using bank overdrafts, which allows it to service its obligations by successfully managing its financial resources and to properly and timely service its obligations.

12/ ASSESSMENT OF THE POSSIBILITIES FOR THE IMPLEMENTATION OF INVESTMENT INTENTIONS WITH THE SIGNIFICANCE OF THE AMOUNT OF EXPENDITURE AND THE EFFECTIVENESS OF THE POSSIBLE CHANGES IN THE STRUCTURE OF FINANCING THAT ACTIVITY.

The management estimates that it is possible to realize the investment intentions declared with the prospectus for initial public offering.

13/ INFORMATION ABOUT OCCURRING CHANGES IN THE REPORTING PERIOD IN THE MAIN PRINCIPLES FOR THE MANAGEMENT OF THE COMPANY AND ITS ECONOMIC GROUP.

There were no changes during the reporting period in the company's main management principles and its economic group.

14/ INFORMATION ABOUT THE MAIN CHARACTERISTICS OF THE FINANCIAL REPORTING PROCESSING INTERNAL CONTROL SYSTEM AND RISK MANAGEMENT SYSTEM IN THE COMPANY.

Under Bulgarian law, the management should prepare an interim report on the operations and a financial statement for each quarter to give a true and fair view of the Company's financial position as of the end of the year, financial performance and cash flows in accordance with the applicable accounting framework. Management's responsibility also includes the implementation of an internal control system to prevent, detect and correct mistakes and false statements as a result of the accounting system's actions. In this respect, the management observes the following basic principles in its activities:

- adherence to a particular management and accounting policy disclosed in the financial statements;
- carrying out all operations in compliance with the laws and regulations; coverage of all events and operations in a timely manner, with the exact amount of the amounts in the appropriate accounting articles.
- accounts and the relevant reporting period so as to allow the financial statements to be prepared in accordance with the specific accounting framework;
- observance of the precautionary principle in the valuation of assets, liabilities, income and expenses;
- detection and termination of frauds and errors;
- completeness and regularity of accounting information;
- preparation of reliable financial information;
- adherence to international financial reporting standards and adherence to the going concern principle.

The interim separate financial statements have been prepared in accordance with the going concern principle, taking into account the possible effects of the inflationary crisis and other risks accompanying the company's activity.

During the reporting period, there have been no changes in the basic principles of management of Sirma Group Holding JSC.

15/ INFORMATION ON CHANGES IN MANAGEMENT AND SUPERVISORY AUTHORITIES DURING THE PERIOD.

No changes during the period considered.

16/ INFORMATION ABOUT THE USE OF THE FUNDS FROM A NEW ISSUED SHARES AND SECURITIES IN THE REPORTING PERIOD.

No funds from a new issued shares and securities were used during the reporting period.

17/ DETAILS OF THE DIRECTOR FOR CONNECTIONS WITH THE INVESTOR, INCLUDING A TELEPHONE AND ADDRESS FOR CORRESPONDENCE.
